Sample solution

Form 4 student records and EDPM results

Organisation: Breadfruit Valley Secondary School, Mandeville
Portfolio element: Data Management using Database Management Software (Query and Report)
Scenario: db-2

Model answer · Teacher's Version

How this meets the marking criteria

Criterion	Marks	Where it is met in this solution
Appropriate field names used (StudentID, FirstName, LastName, DateOfBirth, Sex, Form, District, EDPM, English, Maths, FeesPaid)	**1**	Table STUDENTS, Design View (p. 2): all 11 field names keyed exactly as in Table 1, with no spaces.
Appropriate data types, all present: Short Text for StudentID, FirstName, LastName, Sex, Form, District; Date/Time for DateOfBirth; Number for EDPM, English, Maths; Yes/No for FeesPaid	**2**	p. 2: Data Type column and the field-property summary – Short Text for StudentID, FirstName, LastName, Sex, Form, District; Date/Time for DateOfBirth; Number for EDPM, English, Maths; Yes/No for FeesPaid.
Table STUDENTS populated with all 10 records accurately (1 mark deducted per record with a keying error, minimum 0)	**3**	Datasheet View (p. 3): all 10 records keyed exactly as in Table 2 (checked value by value against the source data).
Suitable primary key selected (StudentID)	**1**	p. 2: key symbol beside StudentID; Indexed = Yes (No Duplicates).
Simple query Form_4B created with criterion Form = "4B" on the correct field	**1**	Query Form_4B (p. 4): "4B" in the Criteria row under Form; Show cleared for Form so only the required fields appear.
Complex query F_EDPM_Over70: criterion 1 (Sex = "F") entered	**1**	Query F_EDPM_Over70 (p. 5): "F" under Sex.
Complex query F_EDPM_Over70: criterion 2 (EDPM >70) entered	**1**	p. 5: >70 under EDPM (a value only, no currency symbol or units).
Correct use of the two criteria: both placed in the same Criteria row (AND) under the correct fields, with only the required fields shown	**2**	p. 5: both criteria on the same Criteria row (AND, confirmed in SQL view); Show ticked only for StudentID, FirstName, LastName, Form, EDPM; Sex used for the criterion only.
Correct results from the queries: Form_4B returns 5 records (HS2402, HS2403, HS2406, HS2407, HS2410); F_EDPM_Over70 returns 3 records (HS2401, HS2403, HS2407)	**2**	p. 4: Form_4B returns 5 records (HS2402, HS2403, HS2406, HS2407, HS2410); p. 5: F_EDPM_Over70 returns 3 records (HS2401, HS2403, HS2407).
Report: appropriate fields selected (StudentID, FirstName, LastName, Form, EDPM) from F_EDPM_Over70	**2**	Report Girls in ICT Report (pp. 6–7): record source F_EDPM_Over70; fields StudentID, FirstName, LastName, Form, EDPM; sorted by EDPM (descending).
Report: correct, specific title (Female Students Scoring Above 70 in EDPM – Girls in ICT Day 2026)	**2**	p. 7: report header reads "Female Students Scoring Above 70 in EDPM – Girls in ICT Day 2026"; name and the label Data Management using Database Management Software in the report footer.
Total	**18**	**Every criterion is met in full.**

Files in this pack: db-2 - Sample solution.pdf; FORM 4 RECORDS - Tables, queries and report.xlsx.

A Microsoft Access .accdb file cannot be produced here, so the table design, the datasheet, both queries and the report are supplied in an Excel workbook (one sheet each, with a Design sheet and a Query Design sheet), and this PDF shows every object as Access displays and prints it. To rebuild the database in Access, create the table in Design View from the Design sheet, then import the STUDENTS sheet (External Data › New Data Source › From File › Excel).

DATABASE DESCRIPTION

The FORM 4 RECORDS database was created for the Head of Department at Breadfruit Valley Secondary School, Mandeville, Jamaica, to store the details and end-of-term marks of Form 4 students. Its one table, STUDENTS, holds ten students with their date of birth, sex, form, district, marks in EDPM, English and Mathematics and whether book and lab fees are paid; StudentID is the primary key because each registration number is unique. The simple query Form_4B lists the five students in 4B for the form teacher, and the complex query F_EDPM_Over70 uses two criteria in the same row (Sex “F” and EDPM >70) to find the three girls who scored above 70 in EDPM. The report Girls in ICT Report lists these girls from the highest EDPM mark to the lowest as the invitation list for Girls in ICT Day in Kingston.

Objects in the database

Object	Name	What it holds or shows
Database	FORM 4 RECORDS	The database file that contains all the objects below.
Table	STUDENTS	10 records, 11 fields; primary key StudentID.
Query (simple)	Form_4B	StudentID, FirstName, LastName, District where Form = 4B – 5 records.
Query (complex)	F_EDPM_Over70	StudentID, FirstName, LastName, Form, EDPM where Sex = F AND EDPM >70 – 3 records.
Report	Girls in ICT Report	Based on F_EDPM_Over70; fields StudentID, FirstName, LastName, Form, EDPM; sorted by EDPM in descending order; title “Female Students Scoring Above 70 in EDPM – Girls in ICT Day 2026”.

Table STUDENTS: Design View

STUDENTS

Field Name	Data Type	Description (Optional)
StudentID	Short Text	School registration number
FirstName	Short Text	Student's first name
LastName	Short Text	Student's surname
DateOfBirth	Date/Time	Date of birth
Sex	Short Text	M or F
Form	Short Text	Class, for example 4A
District	Short Text	District where the student lives
EDPM	Number	End-of-term mark out of 100
English	Number	End-of-term mark out of 100
Maths	Number	End-of-term mark out of 100
FeesPaid	Yes/No	Book and lab fees paid

Report Girls in ICT Report: Design View (record source: F_EDPM_Over70)

The report was created with the Report Wizard from the query **F_EDPM_Over70**, Tabular layout, sorted by **EDPM** (descending). The title was typed in the Report Header; the name and the label were added as labels in the Report Footer, so they print once, after the last record.

Female Students Scoring Above 70 in EDPM – Girls in ICT Day 2026

StudentID	FirstName	LastName	Form	EDPM
HS2403	Keisha	Campbell	4B	91
HS2401	Aaliyah	Richardson	4A	82
HS2407	Destiny	Brooks	4B	76
