Sample solution

Patient records for a blood drive contact list

Organisation: Layou Family Health Clinic
Portfolio element: Data Management using Database Management Software (Query and Report)
Scenario: db-3

Model answer · Teacher's Version

How this meets the marking criteria

Criterion	Marks	Where it is met in this solution
Appropriate field names used (PatientNo, FirstName, LastName, DateOfBirth, Sex, Phone, BloodType, InsurancePlan, Doctor, LastVisit)	1	Table PATIENTS, Design View (p. 2): all 10 field names keyed exactly as in Table 1, with no spaces.
Appropriate data types, all present: Short Text for PatientNo, FirstName, LastName, Sex, Phone, BloodType, InsurancePlan, Doctor; Date/Time for DateOfBirth, LastVisit	2	p. 2: Data Type column and the field-property summary – Short Text for PatientNo, FirstName, LastName, Sex, Phone, BloodType, InsurancePlan, Doctor; Date/Time for DateOfBirth, LastVisit.
Table PATIENTS populated with all 9 records accurately (1 mark deducted per record with a keying error, minimum 0)	3	Datasheet View (p. 3): all 9 records keyed exactly as in Table 2 (checked value by value against the source data).
Suitable primary key selected (PatientNo)	1	p. 2: key symbol beside PatientNo; Indexed = Yes (No Duplicates).
Simple query Benjamin_Patients created with criterion Doctor = "Dr. R. Benjamin" on the correct field	1	Query Benjamin_Patients (p. 4): "Dr. R. Benjamin" in the Criteria row under Doctor; Show cleared for Doctor so only the required fields appear.
Complex query OPos_Since_June: criterion 1 (BloodType = "O+") entered	1	Query OPos_Since_June (p. 5): "O+" under BloodType.
Complex query OPos_Since_June: criterion 2 (LastVisit >=#1-Jun-2026#) entered	1	p. 5: >=#1-Jun-2026# under LastVisit (the date enclosed in # signs, as Access requires for a Date/Time field).
Correct use of the two criteria: both placed in the same Criteria row (AND) under the correct fields, with only the required fields shown	2	p. 5: both criteria on the same Criteria row (AND, confirmed in SQL view); Show ticked only for PatientNo, FirstName, LastName, Phone, BloodType, LastVisit.
Correct results from the queries: Benjamin_Patients returns 5 records (LFH-1001, LFH-1003, LFH-1005, LFH-1007, LFH-1008); OPos_Since_June returns 2 records (LFH-1003, LFH-1006)	2	p. 4: Benjamin_Patients returns 5 records (LFH-1001, LFH-1003, LFH-1005, LFH-1007, LFH-1008); p. 5: OPos_Since_June returns 2 records (LFH-1003, LFH-1006).
Report: appropriate fields selected (PatientNo, FirstName, LastName, Phone, LastVisit) from OPos_Since_June	2	Report Blood Drive Contacts (pp. 6–7): record source OPos_Since_June; fields PatientNo, FirstName, LastName, Phone, LastVisit; sorted by LastName (ascending).
Report: correct, specific title (O+ Patients Seen Since 1 June 2026 – Blood Drive Contact List)	2	p. 7: report header reads "O+ Patients Seen Since 1 June 2026 – Blood Drive Contact List"; name and the label Data Management using Database Management Software in the report footer.
Total	**18**	**Every criterion is met in full.**

Files in this pack: db-3 - Sample solution.pdf; LFH PATIENTS - Tables, queries and report.xlsx.

A Microsoft Access .accdb file cannot be produced here, so the table design, the datasheet, both queries and the report are supplied in an Excel workbook (one sheet each, with a Design sheet and a Query Design sheet), and this PDF shows every object as Access displays and prints it. To rebuild the database in Access, create the table in Design View from the Design sheet, then import the PATIENTS sheet (External Data › New Data Source › From File › Excel).

DATABASE DESCRIPTION

The LFH PATIENTS database was created for Layou Family Health Clinic, St. Vincent, to store its patient cards so that doctors and the receptionist can find patient details quickly. Its one table, PATIENTS, holds nine practice records with each patient's date of birth, sex, telephone number (stored as text), blood type, insurance plan, doctor and date of last visit; PatientNo is the primary key because every clinic number is unique. The simple query Benjamin_Patients lists the five patients of Dr. R. Benjamin, and the complex query OPos_Since_June uses two criteria in the same row (BloodType "O+" and LastVisit >=#1-Jun-2026#) to find the two O+ patients seen on or after 1 June 2026. The report Blood Drive Contacts lists these patients in surname order with their telephone numbers so that the receptionist can contact them for the blood drive.

Objects in the database

Object	Name	What it holds or shows
Database	LFH PATIENTS	The database file that contains all the objects below.
Table	PATIENTS	9 records, 10 fields; primary key PatientNo.
Query (simple)	Benjamin_Patients	PatientNo, FirstName, LastName, Phone, LastVisit where Doctor = Dr. R. Benjamin – 5 records.
Query (complex)	OPos_Since_June	PatientNo, FirstName, LastName, Phone, BloodType, LastVisit where BloodType = O+ AND LastVisit >=#1-Jun-2026# – 2 records.
Report	Blood Drive Contacts	Based on OPos_Since_June; fields PatientNo, FirstName, LastName, Phone, LastVisit; sorted by LastName in ascending order; title "O+ Patients Seen Since 1 June 2026 – Blood Drive Contact List".

Table PATIENTS: Design View

PATIENTS

	Field Name	Data Type	Description (Optional)
🔑	PatientNo	Short Text	Clinic patient number
	FirstName	Short Text	Patient's first name
	LastName	Short Text	Patient's surname
	DateOfBirth	Date/Time	Date of birth
	Sex	Short Text	M or F
	Phone	Short Text	Contact number (text, not a number)
	BloodType	Short Text	Blood group, for example O+
	InsurancePlan	Short Text	Insurance plan or Self-pay
	Doctor	Short Text	Attending doctor
	LastVisit	Date/Time	Date of the most recent visit

Doctor
LastVisit

Field:	PatientNo	FirstName	LastName	Phone	BloodType	LastVisit
Table:	PATIENTS	PATIENTS	PATIENTS	PATIENTS	PATIENTS	PATIENTS
Sort:						
Show:	☑	☑	☑	☑	☑	☑
Criteria:					"O+"	>=#1-Jun-2026#
or:						

Criteria: **"O+"** under **BloodType** and **>=#1-Jun-2026#** under **LastVisit**, both typed in the same Criteria row, so a record must meet both conditions (AND). Show is ticked only for PatientNo, FirstName, LastName, Phone, BloodType, LastVisit.

SQL View of OPos_Since_June

```
SELECT PATIENTS.PatientNo, PATIENTS.FirstName, PATIENTS.LastName, PATIENTS.Phone,
       PATIENTS.BloodType, PATIENTS.LastVisit
FROM PATIENTS
WHERE (((PATIENTS.BloodType)="O+") AND ((PATIENTS.LastVisit)>=#1-Jun-2026#));
```

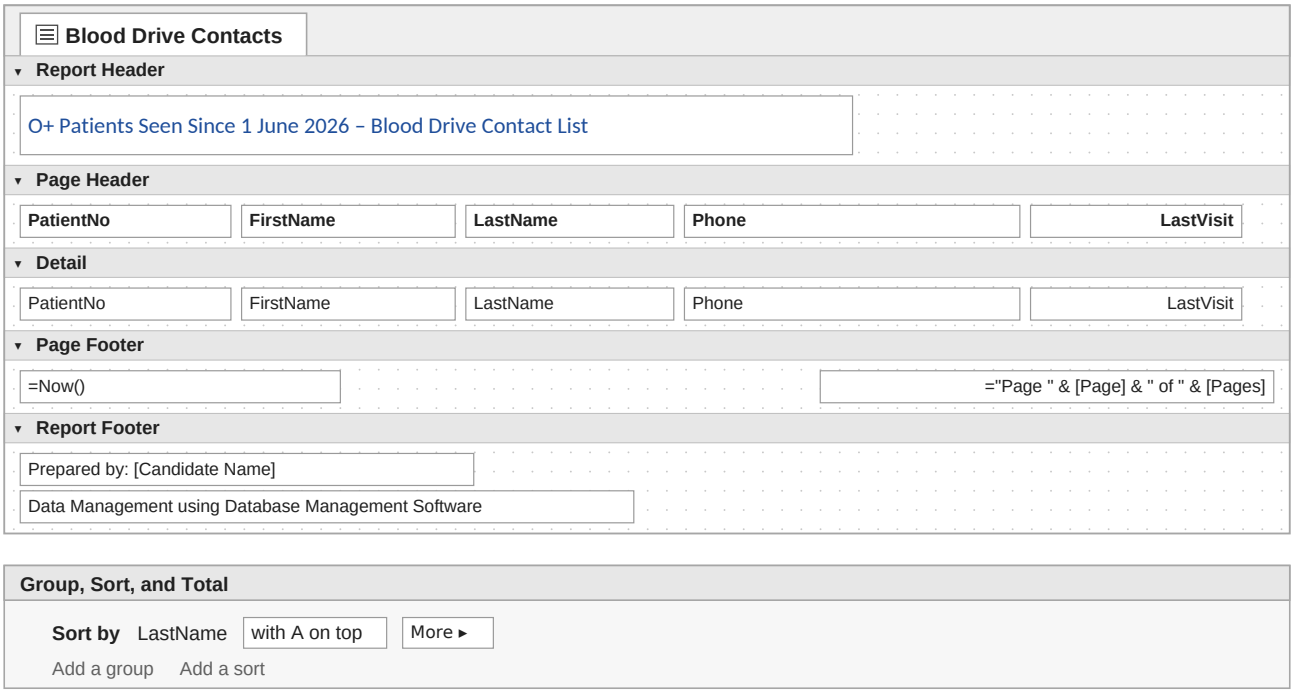

Query OPos_Since_June: Datasheet View (results: 2 records)

OPos_Since_June

PatientNo	FirstName	LastName	Phone	BloodType	LastVisit
LFH-1003	Yvette	Daniel	+1 (784) 454 3051	O+	18-Jun-26
LFH-1006	Desmond	Felix	+1 (784) 453 7725	O+	14-Aug-26
*					

Record: |◂ ◂ 1 of 2 ▸ ▸| ▸* No Filter Search

Report Blood Drive Contacts: Design View (record source: OPos_Since_June)

The report was created with the Report Wizard from the query **OPos_Since_June**, Tabular layout, sorted by **LastName** (ascending). The title was typed in the Report Header; the name and the label were added as labels in the Report Footer, so they print once, after the last record.

O+ Patients Seen Since 1 June 2026 – Blood Drive Contact List

PatientNo	FirstName	LastName	Phone	LastVisit
LFH-1003	Yvette	Daniel	+1 (784) 454 3051	18-Jun-26
LFH-1006	Desmond	Felix	+1 (784) 453 7725	14-Aug-26
