Sample solution

Presenting research on student backup and password habits

Organisation: EDPM research group – student digital safety study
Portfolio element: Presentation using Presentation Software
Scenario: ppt-3

Model answer · Teacher's Version

How this meets the marking criteria

Criterion	Marks	Where it is met in this solution
Appropriate, attractive design suited to the topic (Circuit theme or similar applied consistently to all 10 slides)	1	Circuit-style design on all 10 slides from one slide master and four layouts: dark-blue background, white text and a bright-green accent; the same icon-in-a-circle motif, colours and positions throughout (slides on pp. 6–15; overview on pp. 2–5).
Clear spaces on slides (no more than six bullets, uncluttered); recommended font size (headings 40 pt, body text 24 pt or larger) and style (Segoe UI (one sans-serif font family)); background colour that contrasts with the text – all required	3	Every heading 40 pt bold; body text 28 pt, and 24 pt beside the charts and on the References slide (never below 24 pt); Segoe UI only, including charts; at most 4 bullets per slide with wide margins and free space around icons and charts; strong contrast: white text on dark blue.
Appropriate use of animation: Float In entrance on bullets (slides 2, 3, 5 and 9) and Wipe on charts, consistent and not distracting	2	Float In entrance, On Click, one bullet at a time (By Paragraph) on slides 2, 3, 5 and 9; Wipe (From Bottom) entrance, On Click, on each chart (slides 6, 7 and 8). No other effects. Saved in the .pptx (Animation Pane); animations cannot show on paper.
Appropriate use of graphics (relevant images or icons and the charts on slides 6, 7 and 8) and transitions (Wipe applied to all slides)	2	Relevant icons on slides 1–5 and 9; native pie and column charts made with the chart tool, each with a title and percentage data labels, on slides 6, 7 and 8 (pp. 11, 12 and 13); sources credited on the References slide. Wipe transition, Duration 01.00, On Mouse Click, on all 10 slides.
Headings on each slide and appropriate sequencing: title, introduction, body (questions, method, findings) and conclusion/references	1	A heading on every slide, in a logical order: title (1), introduction (2), research questions (3), purpose (4), method (5), findings (6–8), recommendations and conclusion (9), references (10).
Speaker notes for each of the 10 slides, in full sentences that expand the slide content	2	Notes typed for all 10 slides (55–68 words each) in full sentences that expand the slide; printed as Notes Pages (pp. 6–15). Handouts, 3 slides per page (pp. 2–5). Every printed page carries the label Presentation using Presentation Software and the candidate's name.
Total	11	Every criterion is met in full.

Files in this pack: ppt-3 - Sample solution.pdf; Backup Habits Presentation.pptx.

Slide numbers and a footer with the candidate's name are on every slide except the title slide. Transitions and animations are saved in the .pptx and play in Slide Show. The icons are copyright-free (Font Awesome Free, CC BY 4.0) and are credited on the References slide. Pages 2–5: handouts (3 slides per page); pages 6–15: Notes Pages.

Back It Up! Student Backup and Password Habits

EDPM Research Presentation

[Candidate Name]

Hummingbird Ridge High School

November 2026

Introduction

- Lost work means missed SBA deadlines
- Backups and strong passwords protect files
- Section VIII: file integrity and security

[Candidate Name] 2

Research Questions

- How often do students back up?
- What password habits do they have?
- How many have lost work, and why?

[Candidate Name] 3

Purpose of the Research

- Measure current habits
- Find the main risks
- Plan a digital-safety campaign

[Candidate Name] 4

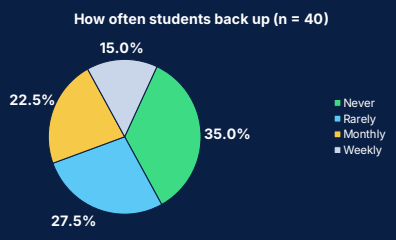

Method of Investigation

- Quantitative survey
- Anonymous questionnaire, 14 items
- Stratified random sample of 40
- 20 Form 4 and 20 Form 5 students

[Candidate Name] 5

How Often Students Back Up

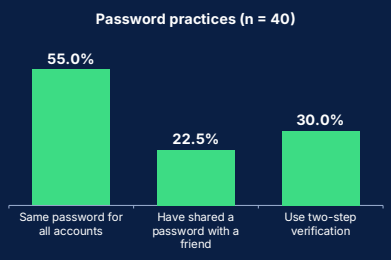

- 35% never back up
- Only 15% back up weekly

[Candidate Name] 6

Password Habits

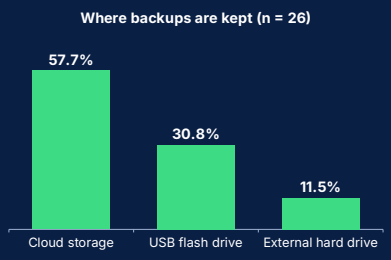

- 55% use one password for everything
- 30% use two-step verification

[Candidate Name] 7

Lost Schoolwork

- 42.5% have lost schoolwork
- Cloud is the most used backup (15 of 26)

[Candidate Name] 8

Recommendations and Conclusion

- Weekly cloud backup reminder before SBA deadlines
- Workshop on strong passwords and two-step verification
- Most students are at risk of losing work

[Candidate Name] 9

[Candidate Name] 10

Good morning, Form 4 and Form 5. Before I begin, raise your hand if you have ever lost a piece of schoolwork because a laptop crashed, a flash drive disappeared or a file would not open. My group surveyed 40 students at our school about how they back up their work and protect their accounts, and today I will share what we found.

Introduction

- Lost work means missed SBA deadlines
- Backups and strong passwords protect files
- Section VIII: file integrity and security

[Candidate Name] 2

Losing work is not just annoying; for an SBA it can mean a missed deadline and lost marks. Regular backups and strong passwords are two simple ways to protect our files. Section VIII of the EDPM syllabus covers the integrity and security of files, including backing up and controlling access, so this topic is part of what we are expected to know and practise.

Research Questions

- How often do students back up?
- What password habits do they have?
- How many have lost work, and why?

[Candidate Name] 3

We asked three research questions. How often do students back up their schoolwork? What password habits do they have? And how many have lost work, and why? We chose these questions because together they show whether students' files are protected against the two main threats: losing a device and someone else getting into their accounts.

Purpose of the Research

- Measure current habits
- Find the main risks
- Plan a digital-safety campaign

[Candidate Name] 4

Our purpose was to measure students' current habits, to find the main risks to their schoolwork and to use the results to plan a digital-safety campaign for the school. The principal has agreed that our findings can guide reminders before SBA deadlines, so every student who took part is helping to protect the work of the whole school.

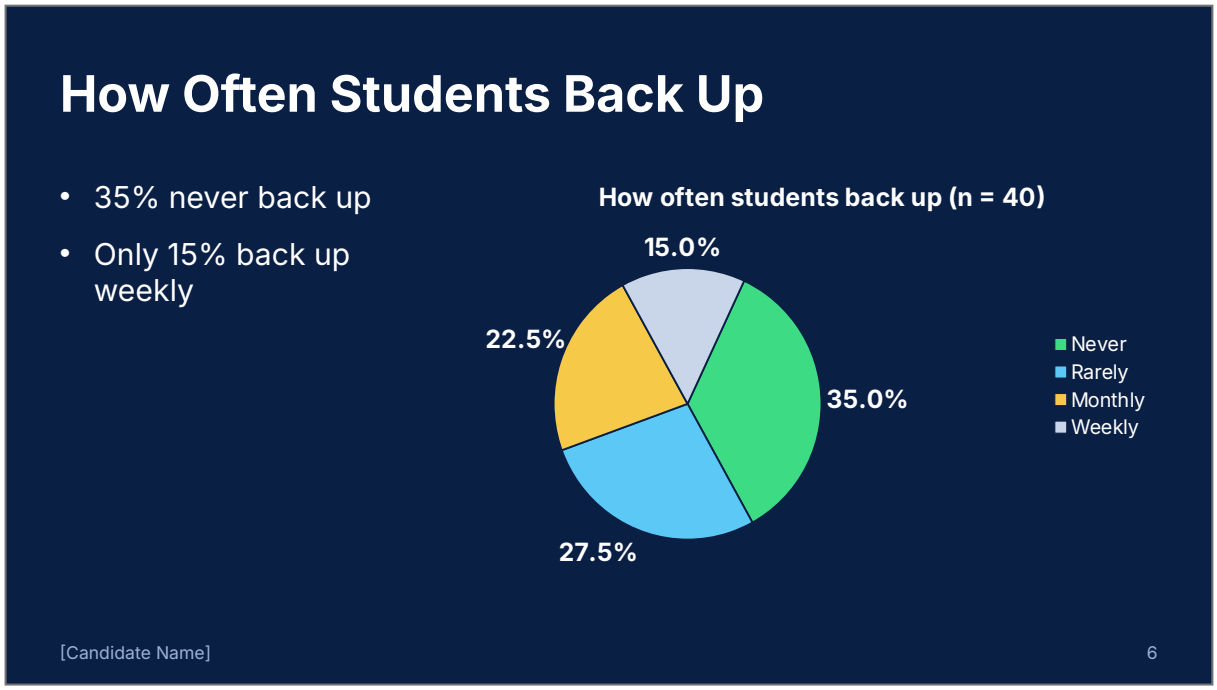

Method of Investigation

- Quantitative survey
- Anonymous questionnaire, 14 items
- Stratified random sample of 40
- 20 Form 4 and 20 Form 5 students

[Candidate Name] 5

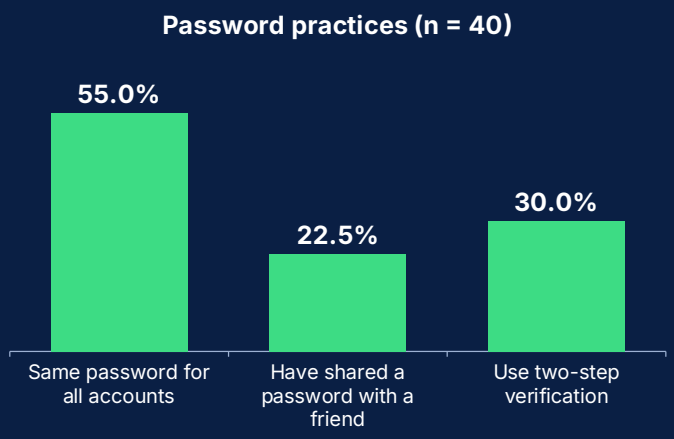

We used a quantitative survey so that the answers could be counted and charted. The questionnaire had fourteen items and was anonymous, which encouraged honest answers about passwords. We used stratified random sampling: the students were divided by form, and twenty names were drawn at random from each of Form 4 and Form 5, giving a sample of 40.

This pie chart shows how often the 40 students back up their schoolwork. Fourteen never back up and eleven do so only rarely, so 25 of the 40 students, almost two-thirds, rarely or never have a second copy. Only six students, 15 per cent, back up every week, which is the habit we would like everyone to adopt.

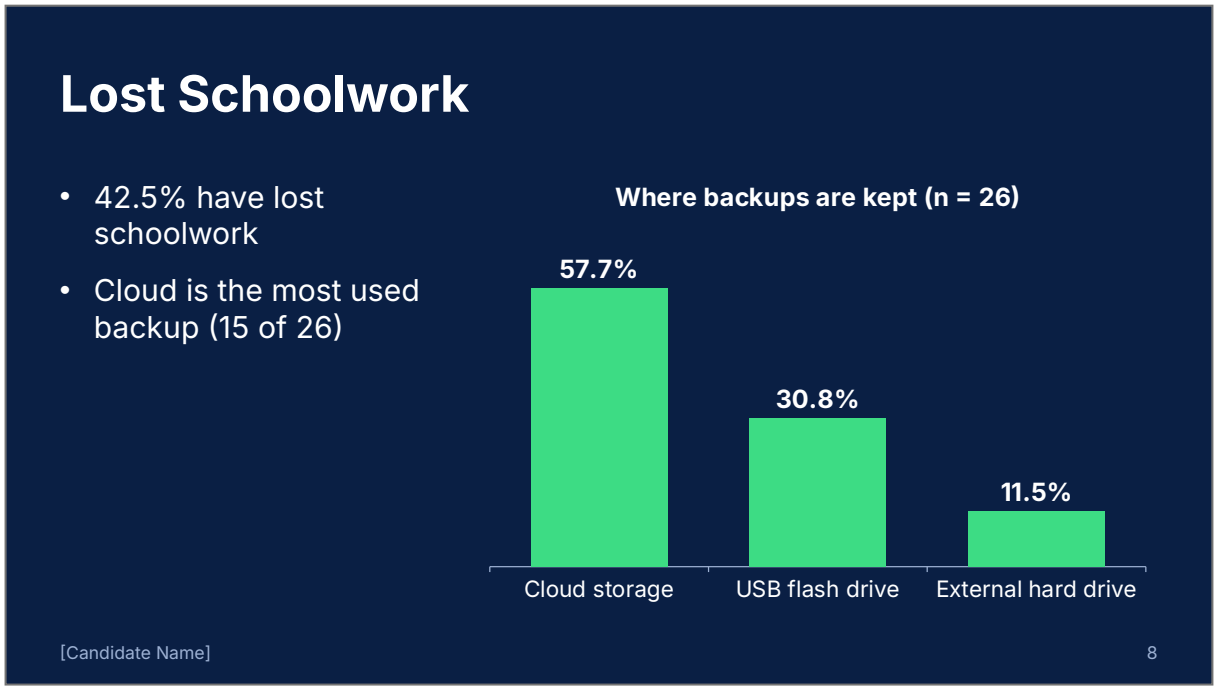

Password Habits

- 55% use one password for everything
- 30% use two-step verification

[Candidate Name] 7

This column chart shows three separate yes-or-no questions about passwords. Twenty-two students, 55 per cent, use the same password for every account, so one leaked password opens everything. Nine have shared a password with a friend. Only twelve students use two-step verification, even though it is free and blocks most attempts to break into an account.

Seventeen of the 40 students, 42.5 per cent, have lost schoolwork through a device failure, loss or theft, which matches the low backup rate. This chart is based only on the 26 students who do back up. Fifteen of them use cloud storage, eight use a USB flash drive and three use an external hard drive. Cloud copies are safest because they survive a lost or broken device.

Recommendations and Conclusion

- Weekly cloud backup reminder before SBA deadlines
- Workshop on strong passwords and two-step verification
- Most students are at risk of losing work

[Candidate Name] 9

We recommend two actions. First, form teachers should post a weekly cloud backup reminder, increasing to daily reminders in the fortnight before each SBA deadline. Second, the EDPM department should run a lunchtime workshop on strong passwords and two-step verification. In conclusion, most students at our school are at risk of losing work, but a few minutes each week would protect it.

Thank you for listening. Our sources are listed here in APA style, including the CSEC EDPM syllabus, our EDPM textbook and the cyber-security guidance from CISA, together with the credit for the icons. Thank you also to the forty students who completed the questionnaire honestly. Are there any questions? Remember: back it up today, before you need it.
