Sample solution

Presenting research on plagiarism and AI tools

Organisation: EDPM research group – academic honesty study
Portfolio element: Presentation using Presentation Software
Scenario: ppt-4

Model answer · Teacher's Version

How this meets the marking criteria

Criterion	Marks	Where it is met in this solution
Appropriate, attractive design suited to the topic (Facet theme or similar applied consistently to all 10 slides)	1	Facet-style design on all 10 slides from one slide master and four layouts: white background, dark-green headings and black text; the same icon-in-a-circle motif, colours and positions throughout (slides on pp. 6–15; overview on pp. 2–5).
Clear spaces on slides (no more than six bullets, uncluttered); recommended font size (headings 40 pt, body text 24 pt or larger) and style (Calibri (one sans-serif font family)); background colour that contrasts with the text – all required	3	Every heading 40 pt bold; body text 28 pt, and 24 pt beside the charts and on the References slide (never below 24 pt); Calibri only, including charts; at most 4 bullets per slide with wide margins and free space around icons and charts; strong contrast: black and dark-green text on white.
Appropriate use of animation: Fade entrance on bullets (slides 2, 3, 5 and 9) and Wipe on charts, consistent and not distracting	2	Fade entrance, On Click, one bullet at a time (By Paragraph) on slides 2, 3, 5 and 9; Wipe (From Bottom) entrance, On Click, on each chart (slides 6, 7 and 8). No other effects. Saved in the .pptx (Animation Pane); animations cannot show on paper.
Appropriate use of graphics (relevant images or icons and the charts on slides 6, 7 and 8) and transitions (Reveal applied to all slides)	2	Relevant icons on slides 1–5 and 9; native column and pie charts made with the chart tool, each with a title and percentage data labels, on slides 6, 7 and 8 (pp. 11, 12 and 13); sources credited on the References slide. Reveal transition, Duration 01.00, On Mouse Click, on all 10 slides.
Headings on each slide and appropriate sequencing: title, introduction, body (questions, method, findings) and conclusion/references	1	A heading on every slide, in a logical order: title (1), introduction (2), research questions (3), purpose (4), method (5), findings (6–8), recommendations and conclusion (9), references (10).
Speaker notes for each of the 10 slides, in full sentences that expand the slide content	2	Notes typed for all 10 slides (55–66 words each) in full sentences that expand the slide; printed as Notes Pages (pp. 6–15). Handouts, 3 slides per page (pp. 2–5). Every printed page carries the label Presentation using Presentation Software and the candidate's name.
Total	11	Every criterion is met in full.

Files in this pack: ppt-4 - Sample solution.pdf; Plagiarism Research Presentation.pptx.

Slide numbers and a footer with the candidate's name are on every slide except the title slide. Transitions and animations are saved in the .pptx and play in Slide Show. The icons are copyright-free (Font Awesome Free, CC BY 4.0) and are credited on the References slide. Pages 2–5: handouts (3 slides per page); pages 6–15: Notes Pages. Slide 7 has two column charts (all 40 students; the 26 who used AI), each with its own Wipe entrance.

Plagiarism and AI Tools in Student Work

EDPM Research Presentation

[Candidate Name]

Calabash Point Secondary

November 2026

Introduction

- Plagiarism: using others' work without credit
- AI chatbots make copying easier
- Section IX: intellectual property and moral rights

Research Questions

- Do students understand plagiarism?
- How do they use AI tools?
- Can they cite in APA style?

Purpose of the Research

- Measure awareness of plagiarism
- Describe AI use honestly
- Inform the school's guidance

[Candidate Name] 4

Method of Investigation

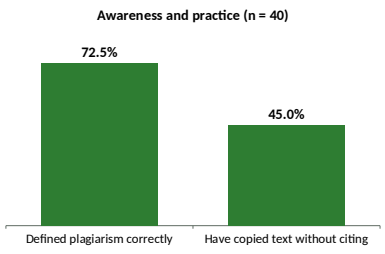

- Quantitative survey and document search
- Anonymous questionnaire, 15 items
- Systematic sample: every third student
- 40 students from Forms 4 and 5

[Candidate Name] 5

Understanding Plagiarism

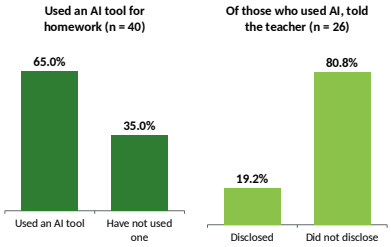

- 72.5% defined plagiarism correctly
- 45% have copied without citing

[Candidate Name] 6

Use of AI Tools

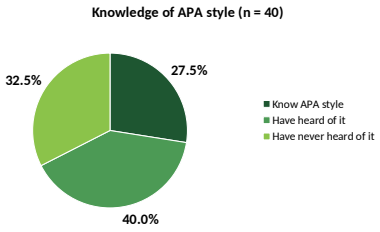

- 65% have used AI for homework
- Only 5 of 26 told their teacher

[Candidate Name] 7

Knowledge of APA Style

- Only 27.5% know APA style
- 32.5% have never heard of it

[Candidate Name] 8

Recommendations and Conclusion

- Teach APA referencing in Form 4
- Require an AI-use statement on SBAs
- Awareness is fair; practice is weak

[Candidate Name] 9

Plagiarism and AI Tools in Student Work

EDPM Research Presentation

[Candidate Name]

Calabash Point Secondary

November 2026

Good afternoon, colleagues, and thank you for inviting me to this staff meeting. I am a Form 5 EDPM candidate, and my group surveyed 40 upper-school students about plagiarism, AI writing tools and referencing. Academic honesty matters greatly for SBAs, because work that is not the candidate's own can be rejected, so we hope our findings will help as you update the school's guidance.

Introduction

- Plagiarism: using others’ work without credit
- AI chatbots make copying easier
- Section IX: intellectual property and moral rights

[Candidate Name] 2

Plagiarism means using another person’s words, ideas or images without giving them credit. AI chatbots now make it very easy to produce text that a student did not write. Section IX of our syllabus teaches that authors have moral rights, including the right to be named as the creator of their work, so plagiarism is not only a school rule but a matter of respecting creators.

Research Questions

- Do students understand plagiarism?
- How do they use AI tools?
- Can they cite in APA style?

[Candidate Name] 3

Our study asked three questions. Do students understand what plagiarism is? How do they use AI tools in their homework? And can they cite sources correctly in APA style, the referencing style our school uses for SBAs? Together the answers show whether students know the rules, how they actually behave and whether they have the skills to work honestly.

Purpose of the Research

- Measure awareness of plagiarism
- Describe AI use honestly
- Inform the school’s guidance

[Candidate Name] 4

The purpose of our research was to measure how aware students are of plagiarism, to describe honestly how they use AI tools and to give teachers evidence for the school’s new academic honesty guidance. Because the questionnaire was anonymous, students could tell the truth without fear, so the results give a realistic picture rather than the answers students think teachers want.

Method of Investigation

- Quantitative survey and document search
- Anonymous questionnaire, 15 items
- Systematic sample: every third student
- 40 students from Forms 4 and 5

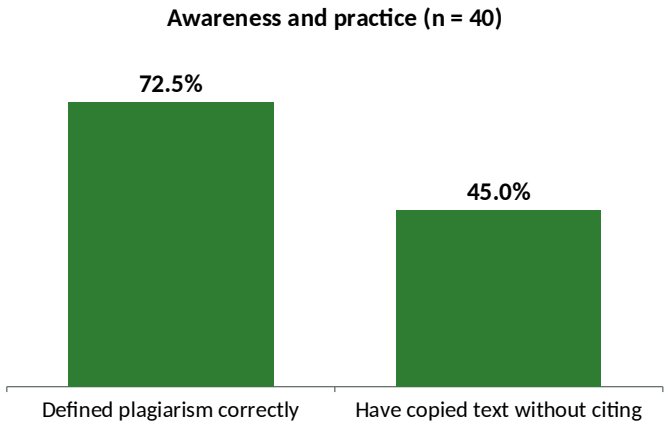

[Candidate Name] 5

We combined a quantitative survey with a search of the school’s existing guidance documents. The anonymous questionnaire had fifteen items. We used systematic sampling: starting from a random point on the Form 4 and Form 5 registers, we chose every third student until we had 40 participants. This gave every student a fair chance of selection and spread the sample across all classes.

Understanding Plagiarism

- 72.5% defined plagiarism correctly
- 45% have copied without citing

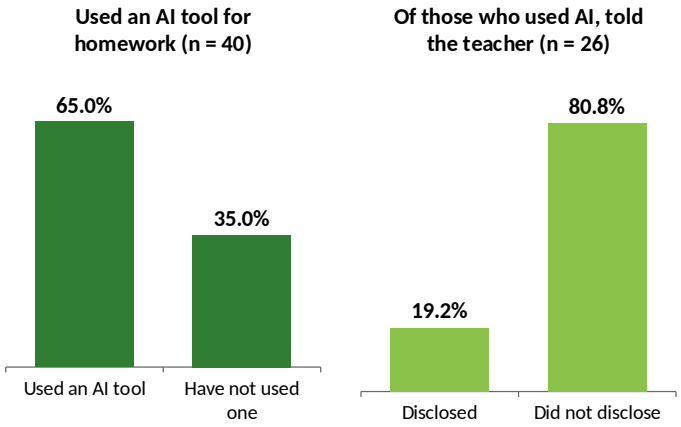

[Candidate Name] 6

This chart shows two separate items. Twenty-nine of the 40 students, 72.5 per cent, defined plagiarism correctly, yet eighteen, 45 per cent, admitted copying text without citing it. There is a clear gap between knowing the rule and following it. Some students may copy because of time pressure, while others may not realise that paraphrasing without a citation is still plagiarism.

Use of AI Tools

- 65% have used AI for homework
- Only 5 of 26 told their teacher

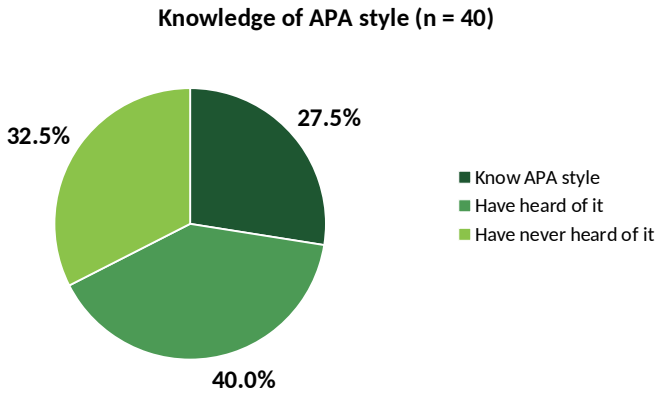

[Candidate Name] 7

The first chart shows that 26 of the 40 students, 65 per cent, have used an AI tool for homework. The second chart looks only at those 26 students: just five of them, 19.2 per cent, told their teacher. Using AI is not always wrong, but hiding it means the work is presented as the student's own, which is a form of plagiarism.

Knowledge of APA Style

- Only 27.5% know APA style
- 32.5% have never heard of it

[Candidate Name] 8

Each student gave one answer here, so a pie chart is suitable. Only eleven students, 27.5 per cent, know how to use APA style, sixteen have heard of it and thirteen have never heard of it. Students who cannot cite correctly may plagiarise by accident, even when they intend to be honest, so referencing skills are an important part of the solution.

Recommendations and Conclusion

- Teach APA referencing in Form 4
- Require an AI-use statement on SBAs
- Awareness is fair; practice is weak

[Candidate Name] 9

We recommend two changes. First, APA referencing should be taught in Form 4, before SBA work begins, with a short practice task in every subject. Second, every SBA should include a signed statement saying whether and how AI tools were used. The academic honesty committee could introduce both next term. In conclusion, awareness is fair, but practice is weak.

[Candidate Name] 10

Thank you for your time. As this is a presentation about plagiarism, every source and image is credited here in APA style: the CSEC EDPM syllabus, the World Intellectual Property Organization and the APA Style website, as well as the licence for the icons. I would welcome your questions and suggestions for the new guidance.
