Sample solution

Presenting research on teenagers and digital piracy

Organisation: EDPM research group – digital piracy study
Portfolio element: Presentation using Presentation Software
Scenario: ppt-5

Model answer · Teacher's Version

How this meets the marking criteria

Criterion	Marks	Where it is met in this solution
Appropriate, attractive design suited to the topic (Gallery theme or similar applied consistently to all 10 slides)	1	Gallery-style design on all 10 slides from one slide master and four layouts: black background, white text and a gold accent (gold headings); the same icon-in-a-circle motif, colours and positions throughout (slides on pp. 6–15; overview on pp. 2–5).
Clear spaces on slides (no more than six bullets, uncluttered); recommended font size (headings 40 pt, body text 24 pt or larger) and style (Century Gothic (one sans-serif font family)); background colour that contrasts with the text – all required	3	Every heading 40 pt bold; body text 28 pt, and 24 pt beside the charts and on the References slide (never below 24 pt); Century Gothic only, including charts; at most 4 bullets per slide with wide margins and free space around icons and charts; strong contrast: white and gold text on black.
Appropriate use of animation: Zoom entrance on bullets (slides 2, 3, 5 and 9) and Wipe on charts, consistent and not distracting	2	Zoom entrance, On Click, one bullet at a time (By Paragraph) on slides 2, 3, 5 and 9; Wipe (From Bottom) entrance, On Click, on each chart (slides 6, 7 and 8). No other effects. Saved in the .pptx (Animation Pane); animations cannot show on paper.
Appropriate use of graphics (relevant images or icons and the charts on slides 6, 7 and 8) and transitions (Cover applied to all slides)	2	Relevant icons on slides 1–5 and 9; native bar, pie and column charts made with the chart tool, each with a title and percentage data labels, on slides 6, 7 and 8 (pp. 11, 12 and 13); sources credited on the References slide. Cover transition, Duration 01.00, On Mouse Click, on all 10 slides.
Headings on each slide and appropriate sequencing: title, introduction, body (questions, method, findings) and conclusion/references	1	A heading on every slide, in a logical order: title (1), introduction (2), research questions (3), purpose (4), method (5), findings (6–8), recommendations and conclusion (9), references (10).
Speaker notes for each of the 10 slides, in full sentences that expand the slide content	2	Notes typed for all 10 slides (49–66 words each) in full sentences that expand the slide; printed as Notes Pages (pp. 6–15). Handouts, 3 slides per page (pp. 2–5). Every printed page carries the label Presentation using Presentation Software and the candidate's name.
Total	11	Every criterion is met in full.

Files in this pack: ppt-5 - Sample solution.pdf; Digital Piracy Presentation.pptx.

Slide numbers and a footer with the candidate's name are on every slide except the title slide. Transitions and animations are saved in the .pptx and play in Slide Show. The icons are copyright-free (Font Awesome Free, CC BY 4.0) and are credited on the References slide. Pages 2–5: handouts (3 slides per page); pages 6–15: Notes Pages.

Free Downloads, Real Costs: Teenagers and Digital Piracy

EDPM Research Presentation

[Candidate Name]

Frangipani Hill Academy

November 2026

Introduction

- Piracy: copying or sharing without permission
- Copyright protects creators' rights
- Economic and moral rights (Section IX)

[Candidate Name] 2

Research Questions

- How common is piracy among teenagers?
- Why do teenagers use pirated content?
- Do they understand creators' rights?

[Candidate Name] 3

Purpose of the Research

- Measure piracy among 14–17-year-olds
- Understand the reasons
- Support local artists

[Candidate Name] 4

Method of Investigation

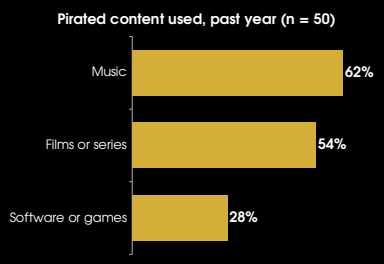

- Quantitative survey
- Anonymous questionnaire, 14 items
- Cluster sample: one Form 4 class per school
- 50 students from three schools

[Candidate Name] 5

How Common Is Piracy?

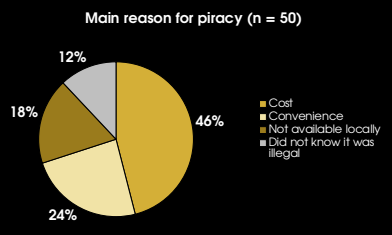

- Music: 62% in the past year
- Software and games: 28%

[Candidate Name] 6

Why Teenagers Pirate

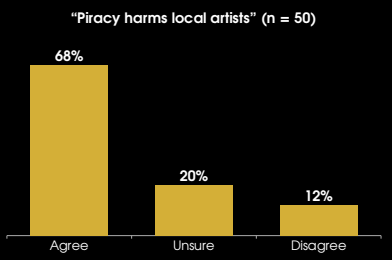

- Cost is the main reason (46%)
- 12% did not know it was illegal

[Candidate Name] 7

Does Piracy Harm Local Artists?

- 68% agree that it does
- 12% disagree

[Candidate Name] 8

Recommendations and Conclusion

- Promote free legal streaming options
- Copyright awareness talks by local artists
- Piracy is common but students care about creators

[Candidate Name] 9

[Candidate Name] 10

Good morning, Honourable Speaker and fellow members of the Youth Parliament. Please raise your hand if you stream music or films. My group surveyed 50 students aged 14 to 17 from three Jamaican schools about pirated music, films and software. Today I will show you how common piracy is among teenagers, why it happens and what it means for our local creators.

Introduction

- Piracy: copying or sharing without permission
- Copyright protects creators' rights
- Economic and moral rights (Section IX)

[Candidate Name] 2

Piracy means copying or sharing music, films or software without the permission of the owner. Copyright protects creators by giving them economic rights, the right to earn money from their work, and moral rights, the right to be named as the creator and to protect the work from distortion. Section IX of the EDPM syllabus covers these rights.

Research Questions

- How common is piracy among teenagers?
- Why do teenagers use pirated content?
- Do they understand creators' rights?

[Candidate Name] 3

We asked three research questions. How common is piracy among teenagers? Why do teenagers use pirated content? And do they understand the rights of creators? These questions let us measure the size of the problem, find its causes and see whether awareness campaigns would help, which is exactly the information a youth parliament needs before proposing a solution.

Purpose of the Research

- Measure piracy among 14–17-year-olds
- Understand the reasons
- Support local artists

[Candidate Name] 4

Our purpose was to measure piracy among 14- to 17-year-olds, to understand the reasons behind it and to find ways of supporting local artists, musicians and film-makers. Jamaica's creative industries provide jobs and income for many young people, so protecting creators' rights also protects opportunities for our own generation.

Method of Investigation

- Quantitative survey
- Anonymous questionnaire, 14 items
- Cluster sample: one Form 4 class per school
- 50 students from three schools

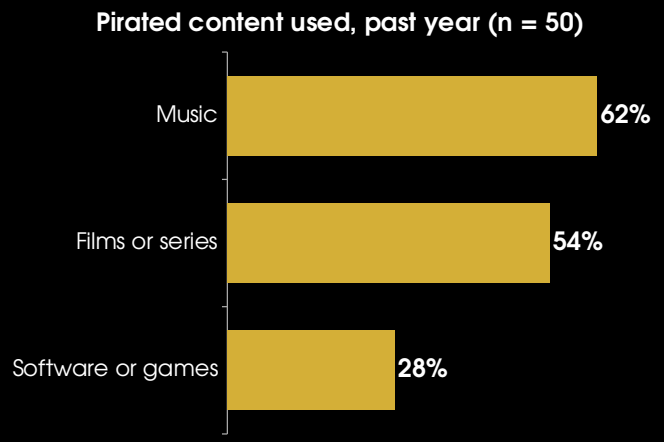

[Candidate Name] 5

We used a quantitative survey with an anonymous fourteen-item questionnaire, so that students could answer honestly. We used cluster sampling: one Form 4 class was chosen at random in each of three schools, and every student in those classes was invited to take part. This gave us 50 students from different parts of Jamaica, collected quickly and at low cost.

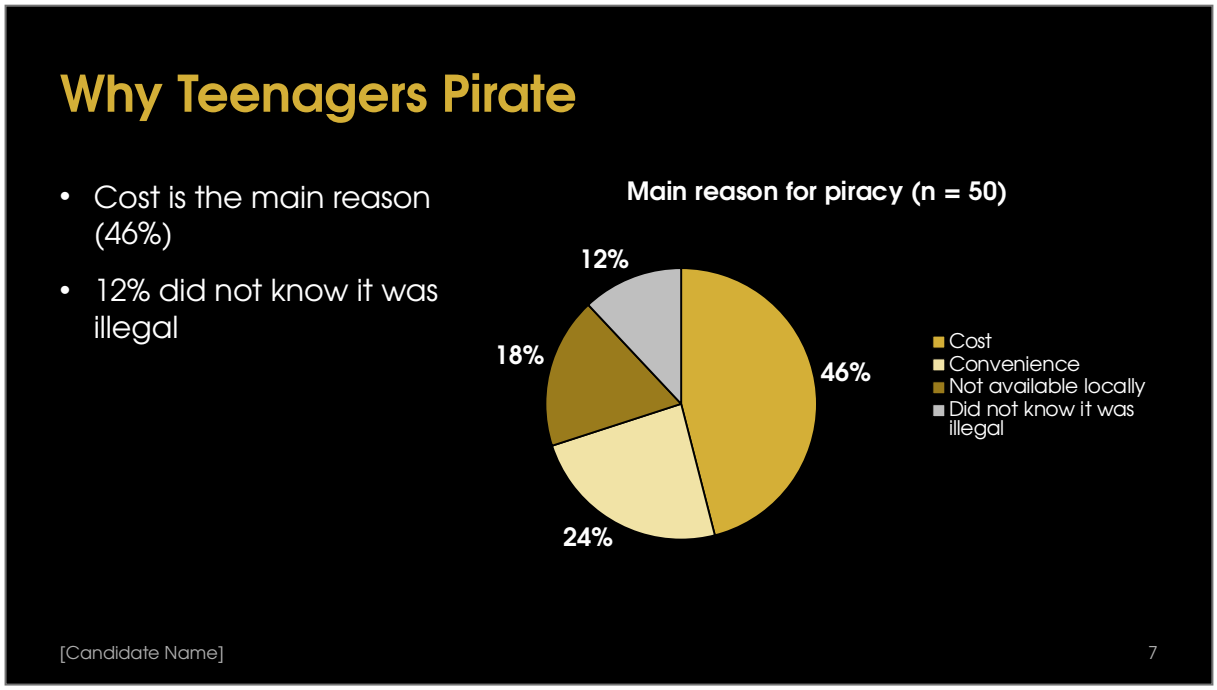

How Common Is Piracy?

- Music: 62% in the past year
- Software and games: 28%

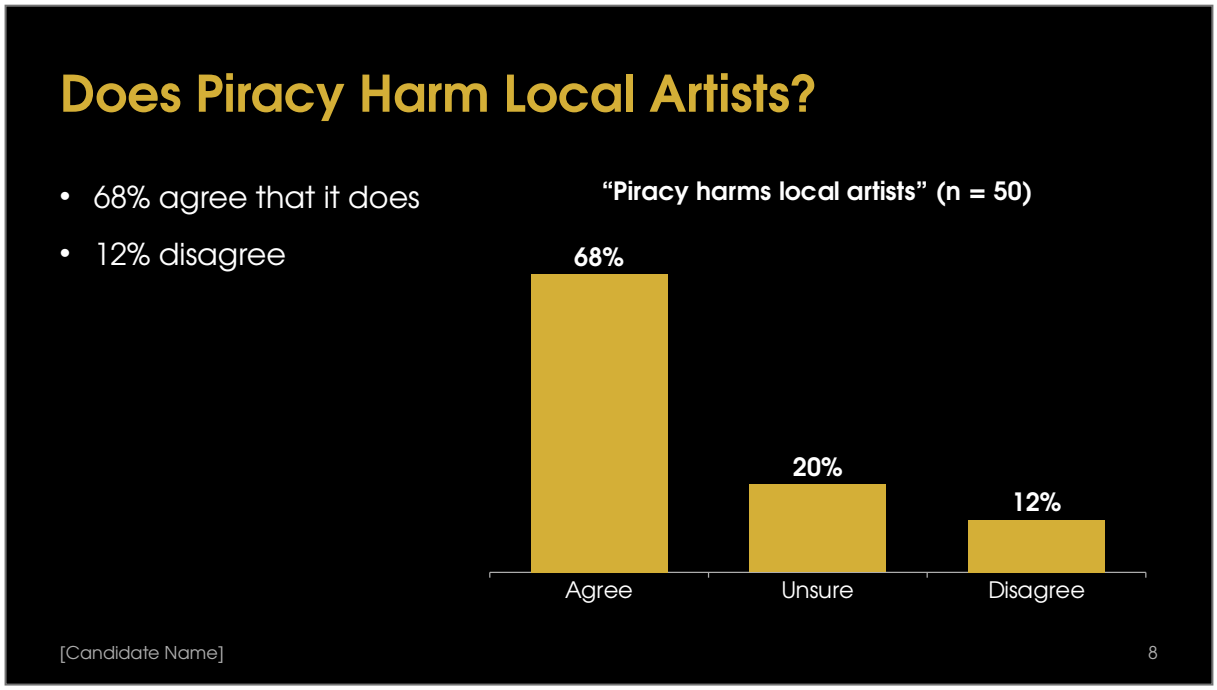

[Candidate Name] 6

This bar chart shows the types of pirated content used in the past year; students could tick more than one. Music is pirated most, by 31 of the 50 students, followed by films or series at 54 per cent. Software and games are pirated least, at 28 per cent, probably because they are harder to copy and often need a licence key.

Each student chose one main reason, so the results are shown as a pie chart. Cost is the main reason, given by 46 per cent, followed by convenience at 24 per cent. Eighteen per cent said the content was not available locally, and 12 per cent did not know piracy was illegal. Cheaper, easier legal options and better awareness could therefore reduce piracy.

When asked whether piracy harms local artists, 34 students, 68 per cent, agreed, ten were unsure and only six disagreed. Yet 31 students pirated music in the past year, so at least 15 of the students who agree must still pirate music. This shows a gap between attitude and behaviour: teenagers care about creators, but cost and convenience still win when they choose what to download.

Recommendations and Conclusion

- Promote free legal streaming options
- Copyright awareness talks by local artists
- Piracy is common but students care about creators

[Candidate Name] 9

We recommend two actions. First, schools and youth groups should promote free, legal streaming options, such as artists' official channels and free plans that still pay royalties. Second, local artists should be invited to give copyright awareness talks in schools, starting with the three schools in our study. In conclusion, piracy is common, but students do care about creators.

Thank you, Honourable Speaker. Our sources are listed here in APA style, including the CSEC EDPM syllabus and the copyright pages of the World Intellectual Property Organization, and the icons are credited under their free licence. We thank the three principals and fifty students who helped us. I now welcome questions from the members.
