Sample solution

E-mail practices in small businesses in Castries

Organisation: Small businesses on Bridge Street and William Peter Boulevard, Castries (generic)
Portfolio element: EDPM Research Assignment – Research Paper
Scenario: research-1

Model answer · Teacher's Version

How this meets the marking criteria

Criterion	Marks	Where it is met in this solution
Phase 1 – Selection of topic/title: topic on e-mail practices in small businesses is focused and suitably titled	1	Title page; 1.1 (p. 1): focused topic and formal title on e-mail features and errors in Castries businesses.
Permission letter to the manager of each participating business: formatting and layout (letterhead, date, inside address, salutation, subject heading, complimentary close, signature block)	2	Appendix A (p. 9): letterhead, date, inside address, salutation, bold subject heading, close and signature block; fully blocked, open punctuation.
Permission letter content: identifies the researchers, the school and the purpose of the research	1	Appendix A (p. 9), paragraph 1: the three researchers, the school and the purpose.
Permission letter content: states what participants will do, the confidentiality of responses and contact details	2	Appendix A (p. 9): one employee completes a 15-item, ten-minute questionnaire; anonymity, totals only, forms shredded; telephone and e-mail.
Schedule of activities: table with Date, Activity and Comments headings and eight activities listed; relevant sequence with comments/follow-up actions	5	Appendix B (p. 10): Date, Activity, Comments; 11 activities in order, each with a follow-up comment.
Research questions relevant to e-mail practices in small businesses and clearly stated	2	1.3 (p. 1): three numbered questions on features used, errors in dispatch and confirming receipt.
Background: general description of e-mail as a business communication medium and its common features; rationale highlighting the impact on small-business employees and their customers (lost time, lost sales, breaches of privacy when Bcc is not used)	3	1.4 (p. 1): e-mail and its features described; lost time, lost sales and Bcc privacy breaches explained.
Background: at least three reputable sources used	2	1.4 (p. 1): four sources cited (CXC; GCFGlobal; Jacob & Augustine; Small).
Purpose of research clearly stated, appropriate and relevant to the topic	2	1.5 (p. 1): one clear purpose statement tied to the research questions.
Phase 2 – Method of research identified (quantitative survey) and justified	2	2.1 (p. 2): quantitative survey named and justified.
Sampling procedure identified and described; selection of sample population (25 employees from 25 businesses) explained	3	2.2 (p. 2): purposive sampling described; 25 of 30 businesses agreed, one daily user each (25 employees).
Data collection instrument (questionnaire): clearly stated, well-sequenced items that address all research questions	4	2.3 (p. 2); Appendix C: 15 items in sections mapped to the questions, defined term, tick boxes, scale, open item.
Phase 3 – Findings presented in at least two different forms, each appropriately labelled and titled	4	3.1 (p. 2): ten tables, a column chart, a bar chart and a pie chart, all numbered and titled.
Tables, charts and graphs show accurate data and use formulae for totals and percentages	2	COUNTIF, COUNTIFS, SUM and % formulae, checked by recalculation; Appendix D (p. 13); workbook Summary and Formula view sheets.
Discussion of findings aligned with the research questions with adequate supporting data	4	3.2 (p. 6): one paragraph per research question with counts and percentages.
Analysis/interpretation: relevant generalisations, linkages, connections and comparisons based on the data	3	3.3 (p. 7): links checking habits and training to errors; explains the commonest error.
Two recommendations relevant to the findings and one relevant implementation strategy	4	3.4 (p. 7): two numbered recommendations and a who/what/when strategy.
Referencing: accurate APA style, two or more references, in-text citation	6	References (p. 8): four APA 7 entries, hanging indents; citations in 1.4.
Phase 4 – Writing skills: organisation and paragraphing, use of language, spelling and grammar	4	Formal register, focused paragraphs, numbered headings; 986-word body (limit 1000).
Written report layout with four elements such as cover page, acknowledgements, table of contents, references and appendices	4	Cover page, acknowledgements, contents, page numbers, references and appendices.
Total	**60**	**Every criterion is met in full.**

Files in this pack: research-1 - Sample solution.pdf; Research report - E-mail practices in Castries.docx; Findings data and charts - E-mail practices in Castries.xlsx.

Phase 3 uses sample findings; every figure comes from workbook formulae, checked by recalculation. Page numbers are the report's own.

SEAGRAPE BAY SECONDARY SCHOOL

Castries, St. Lucia

An Investigation into the Use of E-mail Features and Errors in Dispatch among Employees of Small Businesses in Castries

A research paper presented to the Caribbean Examinations Council in partial fulfilment of the requirements for the Caribbean Secondary Education Certificate® (CSEC®) in Electronic Document Preparation and Management (EDPM): School-Based Assessment – Research Assignment

Prepared by

Group member	Candidate number

Year of examination	2026
Date submitted	13 March 2026

Acknowledgements

We sincerely thank our EDPM teacher, Mrs Natalie Auguste, for her guidance at every stage of this research, and the Principal of Seagrape Bay Secondary School for allowing us to carry out the study.

We are grateful to the managers of the 25 businesses on Bridge Street and William Peter Boulevard who allowed us to survey their staff, and to the employees who completed our questionnaire honestly and promptly. Finally, we thank our parents for their encouragement and for helping with transport during data collection.

Phase 1: Planning the Research

1.1 Topic and Title

Small businesses in Castries depend on e-mail, yet owners complain of misdirected messages, forgotten attachments and missing replies. The group therefore chose the title: *An Investigation into the Use of E-mail Features and Errors in Dispatch among Employees of Small Businesses in Castries*.

1.2 Permission and Schedule of Activities

A permission letter was delivered to the manager of each business invited (Appendix A). The schedule of activities (Appendix B) lists 11 activities from 12 January to 13 March 2026.

1.3 Research Questions

1. Which e-mail features (To, Cc, Bcc, attachments and subject line) do employees of small businesses in Castries use regularly?
2. How often do these employees experience errors in dispatch, such as sending to the wrong recipient or forgetting an attachment?
3. What methods do the businesses use to make sure that an e-mail has been received?

1.4 Background

E-mail is an electronic communication medium that delivers messages and files almost instantly to one or many recipients at little cost (Caribbean Examinations Council [CXC], 2024; Small, 2026). Its common features are the To field for main recipients, Cc for people who need a copy, Bcc for recipients whose addresses must stay hidden, attachments, and a subject line that states what the message is about (GCFGlobal, n.d.; Jacob & Augustine, 2012).

Speed also makes errors in dispatch easy: a misdirected message cannot be recalled, and receipt is not guaranteed (CXC, 2024). In a small business each error wastes time, and a lost quotation can mean a lost sale. When customers' addresses go in the To or Cc field instead of Bcc, every recipient sees the others' addresses, a breach of privacy that damages trust (Jacob & Augustine, 2012).

1.5 Purpose of the Research

This research aims to find out which e-mail features employees of small businesses in Castries use, how often errors in dispatch occur and how receipt is confirmed, so that practical ways to reduce errors and protect customers' privacy can be recommended.

Phase 2: Method of Investigation

2.1 Type of Research

A quantitative survey was used because the research questions ask “which” and “how often”: closed answers from many employees can be counted, turned into percentages and charted for fair comparison.

2.2 Population and Sampling Procedure

The population was office and sales employees of small businesses (fewer than 20 staff) on Bridge Street and William Peter Boulevard. Purposive sampling, which deliberately selects people able to answer the questions, was used: of 30 businesses invited, 25 agreed and each manager named one employee who uses e-mail daily, giving 25 employees from 25 businesses (Table 1), so no business dominated.

2.3 Data Collection Instrument and Procedure

A 15-item questionnaire (Appendix C) has 14 closed items (tick boxes and a frequency scale) and one open item. Sections B, C and D answer Research Questions 1, 2 and 3, and “error in dispatch” is defined on the form so that errors were counted consistently. After a pilot test with three employees outside the sample, the forms were delivered and collected by hand from 2 to 6 February 2026; all 25 were returned.

Phase 3: Presentation and Discussion of Findings

3.1 Presentation of Findings

The answers were entered in Microsoft Excel and summarised with COUNTIF, COUNTIFS, SUM and percentage formulae (Appendix D).

Table 1

Respondents by Type of Business

Type of business	Employees	% of employees
Retail shop	10	40.0%
Travel/tour agency	7	28.0%
Professional office	5	20.0%
Other	3	12.0%
Total	**25**	**100.0%**

Note. n = 25. Counts calculated with COUNTIF and percentages with =count/n in Excel (see Appendix D).

Table 2

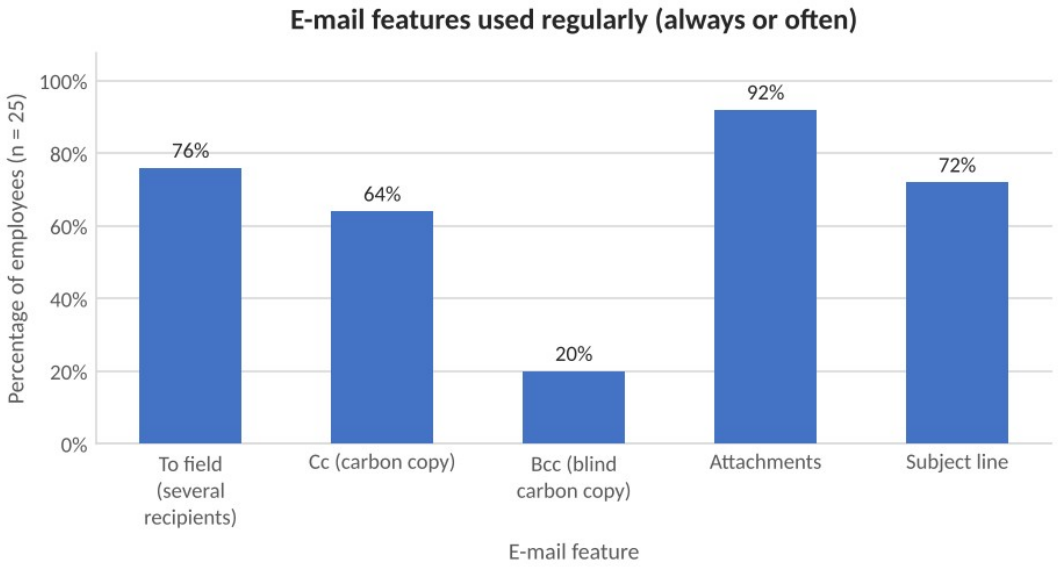

How Often Employees Use Each E-mail Feature (Item 4)

E-mail feature	Always	Often	Sometimes	Never	Used regularly (Always + Often)	% used regularly
To field (several recipients)	9	10	5	1	19	76.0%
Cc (carbon copy)	6	10	7	2	16	64.0%
Bcc (blind carbon copy)	1	4	9	11	5	20.0%
Attachments	15	8	2	0	23	92.0%
Subject line	12	6	5	2	18	72.0%

Note. n = 25. Counts calculated with COUNTIF and percentages with =count/n in Excel (see Appendix D).

Figure 1

Percentage of Employees Using Each E-mail Feature Regularly

Note. Regular use means “always” or “often”; values from the last column of Table 2 (n = 25).

Table 3

Field Used When One Message Is Sent to Many Customers (Item 5)

Field used	Employees	% of employees
Bcc	6	24.0%
To	8	32.0%
Cc	7	28.0%
Separate e-mails	4	16.0%
Total	**25**	**100.0%**

Note. n = 25. Counts calculated with COUNTIF and percentages with =count/n in Excel (see Appendix D).

Table 4

Number of Errors in Dispatch in the Last Three Months (Item 6)

Errors in dispatch	Employees	% of employees
None	4	16.0%
1–2	11	44.0%
3–5	7	28.0%
More than 5	3	12.0%
Total	**25**	**100.0%**

Note. n = 25. Counts calculated with COUNTIF and percentages with =count/n in Excel (see Appendix D).

Table 5

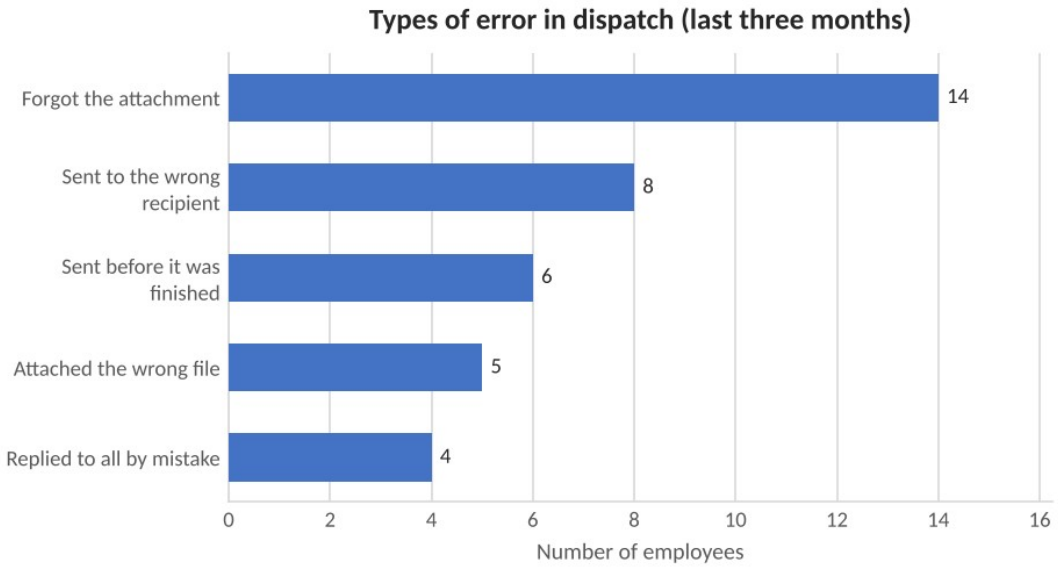

Types of Error in Dispatch (Item 7)

Type of error	Employees	% of all 25 employees
Forgot the attachment	14	56.0%
Sent to the wrong recipient	8	32.0%
Sent before it was finished	6	24.0%
Attached the wrong file	5	20.0%
Replied to all by mistake	4	16.0%

Note. n = 25. Employees could tick more than one type, so counts add to more than 25; percentages are of all 25 employees (=COUNTIF/n, Appendix D).

Figure 2

Types of Error in Dispatch Made in the Last Three Months

Note. Number of employees who made each type of error (from Table 5).

Table 6

Main Consequence of Errors in Dispatch (Item 8)

Main consequence	Employees	% of employees
Time lost correcting	11	44.0%
Customer complaint	4	16.0%
Private information exposed	2	8.0%
Lost sale or order	1	4.0%
No consequence	7	28.0%
Total	**25**	**100.0%**

Note. n = 25. Counts calculated with COUNTIF and percentages with =count/n in Excel (see Appendix D).

Table 7

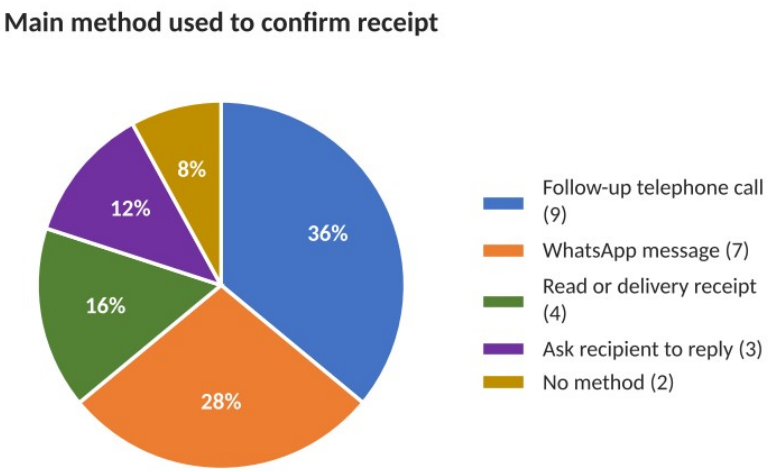

Main Method Used to Confirm That an E-mail Has Been Received (Item 10)

Method	Employees	% of employees
Follow-up telephone call	9	36.0%
WhatsApp message	7	28.0%
Read or delivery receipt	4	16.0%
Ask recipient to reply	3	12.0%
No method	2	8.0%
Total	**25**	**100.0%**

Note. n = 25. Counts calculated with COUNTIF and percentages with =count/n in Excel (see Appendix D).

Figure 3

Main Method Used to Confirm Receipt of an E-mail

Note. Share of the 25 employees choosing each method (from Table 7).

Table 8

Checking Before Sending Compared with Number of Errors (Items 6 and 9)

Checks recipients and attachments before Send	Employees	3–5 errors	More than 5 errors	3 or more errors	% with 3 or more errors
Always	7	0	0	0	0.0%
Sometimes	14	6	0	6	42.9%
Never	4	1	3	4	100.0%

Note. Counts by COUNTIF and COUNTIFS; % = employees with 3 or more errors ÷ employees in the row.

Table 9

Training Received Compared with Number of Errors (Items 6 and 13)

Training received	Employees	3–5 errors	More than 5 errors	3 or more errors	% with 3 or more errors
Formal course	3	0	0	0	0.0%
On the job	8	2	0	2	25.0%
None	14	5	3	8	57.1%

Note. Counts by COUNTIF and COUNTIFS; % = employees with 3 or more errors ÷ employees in the row.

Table 10

Replies, E-mail Rules, Training and Suggestions (Items 11–15)

Finding	Employees	% of employees
Important e-mails often go unanswered	6	24.0%
Important e-mails sometimes go unanswered	11	44.0%
Business has written e-mail rules	5	20.0%
Would attend a short e-mail training session	17	68.0%
Suggested checking before sending	9	36.0%
Suggested staff training	7	28.0%

Note. n = 25. Counts calculated with COUNTIF and percentages with =count/n in Excel (see Appendix D).

3.2 Discussion of Findings

Research Question 1. Attachments were the most regularly used feature (23 of 25 employees, 92%), followed by the To field (76%), the subject line (72%) and Cc (64%); only 5 used Bcc regularly (Table 2, Figure 1). When writing to many customers, 15 employees (60%) exposed addresses in the To or Cc field (Table 3).

Research Question 2. Errors were common: 21 employees (84%) made at least one in three months and 10 (40%) made three or more (Table 4). Forgetting the attachment was the most frequent error (14 employees), followed by sending to the wrong recipient (8) (Table 5, Figure 2). Most errors cost time (11), but 4 caused complaints, 2 exposed private information and 1 lost a sale (Table 6).

Research Question 3. Receipt was confirmed mainly by a follow-up telephone call (9, 36%) or a WhatsApp message (7, 28%); only 4 used read or delivery receipts and 2 had no method (Table 7, Figure 3). Important e-mails often went unanswered for 6 employees (Table 10).

3.3 Analysis and Interpretation

Employees use e-mail mainly to send documents, which explains why a forgotten attachment is the most common error. Checking habits are linked to errors: none of the 7 employees who always check before clicking Send made three or more errors, compared with 42.9% of those who sometimes check and all 4 who never check (Table 8). Similarly, 57.1% of untrained employees made three or more errors, against 25% of those trained on the job and none with a formal course (Table 9). Errors therefore come mainly from careless sending, not the e-mail system. Because Bcc and read receipts are rarely used, privacy is at risk and e-mail is not trusted on its own.

3.4 Recommendations and Implementation Strategy

1. Every business should adopt a “check before you send” routine (recipients, attachment, subject line) and use Bcc whenever one message goes to several customers.
2. Businesses should train staff in e-mail features and read receipts; 17 employees (68%) said they would attend.

Implementation strategy: In April 2026 our group will give the 25 managers a summary of the findings and a “check before you send” card. By the end of May each manager will hold a 30-minute staff session, then count errors again three months later.

Conclusion

Attachments, the To field and the subject line are used regularly, but Bcc seldom. Errors in dispatch, mainly forgotten attachments and wrong recipients, are common, and receipt is usually confirmed by telephone or WhatsApp. Since employees who check before sending and who are trained make fewer errors, simple routines and training should make e-mail safer for small businesses in Castries.

Appendices

Appendix A: Permission Letter

The same letter, addressed individually, was delivered to the manager of each of the 30 businesses invited; one copy is shown.

SEAGRAPE BAY SECONDARY SCHOOL
Morne Road, Castries, St. Lucia
Telephone: (758) 555-0142 | E-mail: office@seagrapebaysec.edu.lc

19 January 2026

Mr Marcus Fontenelle
Manager
Harbourview Travel Services Ltd
Bridge Street
Castries
ST LUCIA

Dear Mr Fontenelle

REQUEST FOR PERMISSION TO SURVEY ONE EMPLOYEE ABOUT E-MAIL PRACTICES

We are Kayla Joseph, Jaden Charles and Shania Alexander, Form 5 students of Seagrape Bay Secondary School. As part of our CSEC Electronic Document Preparation and Management (EDPM) School-Based Assessment, we are carrying out research titled “An Investigation into the Use of E-mail Features and Errors in Dispatch among Employees of Small Businesses in Castries”.

The purpose of the study is to find out which e-mail features employees use, how often errors such as sending a message to the wrong person or forgetting an attachment occur, and how businesses make sure that their messages are received. We hope that the results will help small businesses in Castries to save time and serve their customers better.

We request your permission to invite one employee who uses e-mail every day to complete a questionnaire of 15 short items. It takes about ten minutes and can be completed at a convenient time between 2 and 6 February 2026. We will deliver and collect the questionnaire in person.

Taking part is voluntary. The questionnaire does not ask for the employee’s name or the name of your business, and we will not see any e-mail messages or addresses. Completed forms will be seen only by our group and our teacher, results will be reported only as totals, and the forms will be shredded after our report has been marked.

If you have any questions, please contact me at (758) 555-0187 or kayla.joseph@seagrapebaysec.edu.lc, or our EDPM teacher, Mrs Natalie Auguste, at the school telephone number above. A copy of the questionnaire is enclosed. Thank you for considering our request.

Yours sincerely

Kayla Joseph
Group Leader, Form 5 EDPM Research Group

Group members: Jaden Charles and Shania Alexander

Enc Questionnaire
c Mrs Natalie Auguste, EDPM Teacher

Appendix B: Schedule of Activities (Workplan)

The group followed this schedule of activities from January to March 2026.

Date	Activity	Comments / follow-up action
12 Jan 2026	Formed the group, chose the topic and agreed the title	Teacher approved the title on 14 January; roles shared: leader, data, writing.
14–16 Jan 2026	Read background sources and wrote research questions	Recorded full APA details of every source used.
19 Jan 2026	Wrote and delivered permission letters to 30 managers	Followed up on 23 January; 25 managers agreed and named an employee.
21–23 Jan 2026	Designed the questionnaire	Teacher checked that every item matches a research question.
26 Jan 2026	Pilot-tested the questionnaire with three employees outside the sample	Added a definition of “error in dispatch” and reworded Item 6.
2–6 Feb 2026	Delivered and collected the 25 questionnaires	All 25 returned (100% response); forms kept in a sealed folder.
9–13 Feb 2026	Entered the data in Excel; created formulae, tables and charts	Each entry checked twice against the paper forms.
16–20 Feb 2026	Wrote the discussion, analysis and recommendations	Linked every point to a table or figure.
23 Feb–4 Mar 2026	Wrote the first draft of the report	Draft given to the teacher for feedback on 4 March.
9–11 Mar 2026	Edited the report; completed references, contents and appendices	Checked word count (under 1000) and APA style.
13 Mar 2026	Submitted the report	Thank-you notes sent to the 25 managers; forms to be shredded after marking.

Appendix C: Questionnaire

Questionnaire: E-mail Practices in Small Businesses in Castries

We are Form 5 students of Seagrape Bay Secondary School carrying out research for our CSEC EDPM School-Based Assessment. Please answer every question honestly. Do **not** write your name or the name of your business. Your answers are confidential and will be reported only as totals. Tick ONE box unless the question says "tick all that apply".

An error in dispatch is any e-mail sent to the wrong person, sent without its attachment or with the wrong attachment, sent before it was finished, or sent to everyone by mistake.

Section A: About you and your business

1. What type of business do you work in?

☐ Retail shop ☐ Professional office (law, accounts, insurance)

☐ Travel/tour agency ☐ Other

2. What is your job role?

☐ Office/administrative ☐ Sales ☐ Supervisor/manager

3. For how many years have you used e-mail at work?

☐ Less than 2 ☐ 2–5 ☐ 6–10 ☐ More than 10

Section B: E-mail features

4. How often do you use each of these e-mail features?

	Always	Often	Sometimes	Never
(a) To field with several recipients	☐	☐	☐	☐
(b) Cc (carbon copy)	☐	☐	☐	☐
(c) Bcc (blind carbon copy)	☐	☐	☐	☐
(d) Attachments	☐	☐	☐	☐
(e) A clear subject line	☐	☐	☐	☐

5. When you send ONE message to MANY customers, where do you put their addresses?

☐ In the To field ☐ In the Bcc field

☐ In the Cc field ☐ I send separate e-mails

Section C: Errors in dispatch

6. How many errors in dispatch have you made in the last three months?

☐ None ☐ 1–2 ☐ 3–5 ☐ More than 5

7. Which types of error have you made in the last three months? (Tick all that apply.)

☐ Forgot the attachment ☐ Attached the wrong file

☐ Sent to the wrong recipient ☐ Replied to all by mistake

☐ Sent before it was finished ☐ None

8. What was the MAIN consequence of your errors?

☐ Time lost correcting and resending ☐ Lost sale or order

☐ Customer complaint ☐ No consequence / no errors

☐ Private information seen by the wrong person

9. Do you check the recipients and attachments before you click Send?

☐ Always ☐ Sometimes ☐ Never

Section D: Making sure e-mails are received

10. Which method does your business MOST often use to make sure an e-mail has been received?

☐ Follow-up telephone call ☐ Ask the recipient to reply

☐ WhatsApp message ☐ No method

☐ Read or delivery receipt

11. How often does an important e-mail you send receive no reply?

☐ Often ☐ Sometimes ☐ Rarely ☐ Never

12. Does your business have written rules (a policy) for using e-mail?

☐ Yes ☐ No ☐ Not sure

Section E: Training

13. Have you received any training in using e-mail?

☐ Yes, a formal course ☐ Yes, on the job ☐ No

14. Would you attend a free 30-minute session on e-mail features?

☐ Yes ☐ Maybe ☐ No

15. What ONE change would reduce e-mail errors in your business?

_____

_____

Thank you for taking part. Please return this form in the envelope provided.

Appendix D: Spreadsheet Formulae

The findings were entered in Microsoft Excel (sheet *Responses*, one row per employee) and summarised on the *Summary* sheet. Every count, total, average and percentage in the tables and charts is calculated by a formula; the main formulae are listed below (cell references are on the *Summary* sheet).

Table	Column / item	Cell	Formula
–	Number of employees	B3	=COUNTA(Responses!$A$2:$A$26)
Table 1	Employees (first row, then copied down)	B7	=COUNTIF(Responses!$B$2:$B$26,"Retail shop")
Table 1	% of employees (first row, then copied down)	C7	=B7/Summary!$B$3
Table 1	Employees (total row)	B11	=SUM(B7:B10)
Table 1	% of employees (total row)	C11	=B11/B$11
Table 2	Always (first row, then copied down)	B15	=COUNTIF(Responses!$E$2:$E$26,"Always")
Table 2	Often (first row, then copied down)	C15	=COUNTIF(Responses!$E$2:$E$26,"Often")
Table 2	Sometimes (first row, then copied down)	D15	=COUNTIF(Responses!$E$2:$E$26,"Sometimes")
Table 2	Never (first row, then copied down)	E15	=COUNTIF(Responses!$E$2:$E$26,"Never")
Table 2	Used regularly (Always + Often) (first row, then copied down)	F15	=B15+C15
Table 2	% used regularly (first row, then copied down)	G15	=F15/Summary!$B$3
Table 3	Employees (first row, then copied down)	B23	=COUNTIF(Responses!$J$2:$J$26,"Bcc")
Table 3	% of employees (first row, then copied down)	C23	=B23/Summary!$B$3
Table 3	Employees (total row)	B27	=SUM(B23:B26)
Table 3	% of employees (total row)	C27	=B27/B$27
Table 4	Employees (first row, then copied down)	B31	=COUNTIF(Responses!$K$2:$K$26,"None")
Table 4	% of employees (first row, then copied down)	C31	=B31/Summary!$B$3
Table 4	Employees (total row)	B35	=SUM(B31:B34)
Table 4	% of employees (total row)	C35	=B35/B$35
Table 5	Employees (first row, then copied down)	B39	=COUNTIF(Responses!$L$2:$L$26,"Yes")
Table 5	% of all 25 employees (first row, then copied down)	C39	=B39/Summary!$B$3
Table 6	Employees (first row, then copied down)	B48	=COUNTIF(Responses!$Q$2:$Q$26,"Time lost correcting")
Table 6	% of employees (first row, then copied down)	C48	=B48/Summary!$B$3
Table 6	Employees (total row)	B53	=SUM(B48:B52)

Table	Column / item	Cell	Formula
Table 6	% of employees (total row)	C53	=B53/B$53
Table 7	Employees (first row, then copied down)	B57	=COUNTIF(Responses!$S$2:$S$26,"Follow-up telephone call")
Table 7	% of employees (first row, then copied down)	C57	=B57/Summary!$B$3
Table 7	Employees (total row)	B62	=SUM(B57:B61)
Table 7	% of employees (total row)	C62	=B62/B$62
Table 8	Employees (first row, then copied down)	B66	=COUNTIF(Responses!$R$2:$R$26,"Always")
Table 8	3–5 errors (first row, then copied down)	C66	=COUNTIFS(Responses!$R$2:$R$26,"Always",Responses! $K$2:$K$26,"3–5")
Table 8	More than 5 errors (first row, then copied down)	D66	=COUNTIFS(Responses!$R$2:$R$26,"Always",Responses! $K$2:$K$26,"More than 5")
Table 8	3 or more errors (first row, then copied down)	E66	=C66+D66
Table 8	% with 3 or more errors (first row, then copied down)	F66	=E66/B66
Table 9	Employees (first row, then copied down)	B72	=COUNTIF(Responses!$V$2:$V$26,"Formal course")
Table 9	3–5 errors (first row, then copied down)	C72	=COUNTIFS(Responses!$V$2:$V$26,"Formal course",Responses! $K$2:$K$26,"3–5")
