# Sample solution

## Manual and electronic filing in Georgetown offices

**Organisation:** Law, medical and real-estate offices in Georgetown (generic)
**Portfolio element:** EDPM Research Assignment – Research Paper
**Scenario:** research-3

**Model answer · Teacher's Version**

### How this meets the marking criteria

| Criterion | Marks | Where it is met in this solution |
|---|---|---|
| Phase 1 – Selection of topic/title: topic on manual and electronic filing systems in offices is focused and suitably titled | 1 | Title page; 1.1 (p. 1): focused topic and formal title comparing manual and electronic filing in Georgetown offices. |
| Permission letter to the office manager of each office: formatting and layout (letterhead, date, inside address, salutation, subject heading, complimentary close, signature block) | 2 | Appendix A (p. 10): letterhead, date, inside address, salutation, bold subject heading, close and signature block; fully blocked, open punctuation. |
| Permission letter content: identifies the researchers, the school and the purpose of the research | 1 | Appendix A (p. 10), paragraph 1: the three researchers, the school and the purpose. |
| Permission letter content: states what participants will do, the confidentiality of responses and contact details | 2 | Appendix A (p. 10): a 25-minute interview, an observation checklist and timing of one dummy file; anonymity, totals only, forms shredded; telephone and e-mail. |
| Schedule of activities: table with Date, Activity and Comments headings and eight activities listed; relevant sequence with comments/follow-up actions | 5 | Appendix B (p. 11): Date, Activity, Comments; 11 activities in order, each with a follow-up comment. |
| Research questions relevant to manual and electronic filing systems in offices and clearly stated | 2 | 1.3 (p. 1): three numbered questions on systems used, retrieval time and filing and retention problems. |
| Background: general description of manual and electronic filing systems; rationale highlighting the impact on office staff and clients (speed of service, lost files, storage costs and legal retention requirements) | 3 | 1.4 (p. 1): manual and electronic filing described; speed of service, lost files, storage costs and legal retention explained. |
| Background: at least three reputable sources used | 2 | 1.4 (p. 1): four sources cited (CXC; Jacob & Augustine; Shepherd & Yeo; Small). |
| Purpose of research clearly stated, appropriate and relevant to the topic | 2 | 1.5 (p. 1): one clear purpose statement tied to the research questions. |
| Phase 2 – Method of research identified (qualitative (interviews and observation)) and justified | 2 | 2.1 (p. 2): qualitative research (interviews and observation) supported by timings named and justified. |
| Sampling procedure identified and described; selection of sample population (6 offices (2 law, 2 medical, 2 real estate)) explained | 3 | 2.2 (p. 2): purposive sampling described; two law, two medical and two real-estate offices chosen and explained. |
| Data collection instrument (interview schedule and observation checklist): clearly stated, well-sequenced items that address all research questions | 4 | 2.3 (p. 2); Appendices C and D: 10-question interview schedule and 9-item observation checklist with a timing sheet. |
| Phase 3 – Findings presented in at least two different forms, each appropriately labelled and titled | 4 | 3.1 (p. 2): seven formula tables, two observation tables, a pie chart, a column chart, a bar chart and a folder diagram, all numbered and titled. |
| Tables, charts and graphs show accurate data and use formulae for totals and percentages | 2 | COUNTIF, COUNTIFS, COUNTA, AVERAGE, MIN, MAX and % formulae, checked by recalculation; Appendix E (p. 15); workbook Summary and Formula view sheets. |
| Discussion of findings aligned with the research questions with adequate supporting data | 4 | 3.2 (p. 7): one paragraph per research question with counts and percentages. |
| Analysis/interpretation: relevant generalisations, linkages, connections and comparisons based on the data | 3 | 3.3 (p. 7): compares retrieval speeds and problems by system and office type; links lost files to missing backups. |
| Two recommendations relevant to the findings and one relevant implementation strategy | 4 | 3.4 (p. 8): two numbered recommendations and a who/what/when strategy. |
| Referencing: accurate APA style, two or more references, in-text citation | 6 | References (p. 9): four APA 7 entries, hanging indents; citations in 1.4. |
| Phase 4 – Writing skills: organisation and paragraphing, use of language, spelling and grammar | 4 | Formal register, focused paragraphs, numbered headings; 944-word body (limit 1000). |
| Written report layout with four elements such as cover page, acknowledgements, table of contents, references and appendices | 4 | Cover page, acknowledgements, contents, page numbers, references and appendices. |
| **Total** | **60** | **Every criterion is met in full.** |

**Files in this pack:** research-3 - Sample solution.pdf; Research report - Manual and electronic filing in Georgetown.docx; Findings data and charts - Manual and electronic filing in Georgetown.xlsx.

Phase 3 uses sample findings; every figure comes from workbook formulae, checked by recalculation. Page numbers are the report's own.

**CORALSTONE COLLEGE**

## Acknowledgements

We thank our EDPM teacher, Ms Rhonda Benjamin, for her guidance, and the Principal of Coralstone College for allowing us to carry out this research during school hours.

We are especially grateful to the office managers and filing clerks of the two law offices, two medical offices and two real-estate agencies who welcomed us, answered our questions patiently and allowed us to time the retrieval of a file. We also thank our parents for their support.

## Phase 1: Planning the Research

### 1.1 Topic and Title

Many professional offices in Georgetown still keep paper files in cabinets, while others have scanned their records or use document management software. The group therefore chose the title: *A Comparison of Manual and Electronic Filing Systems Used by Professional Offices in Georgetown*.

### 1.2 Permission and Schedule of Activities

A permission letter was delivered to the office manager of each office (Appendix A). The schedule of activities (Appendix B) lists 11 activities from 12 January to 13 March 2026.

### 1.3 Research Questions

1. What filing systems (manual, electronic or both) are used by professional offices in Georgetown?
2. How does the time taken to retrieve a file compare between manual and electronic systems?
3. What problems do offices experience with their filing and retention of records?

### 1.4 Background

A manual filing system stores paper documents in folders, drawers and cabinets, classified alphabetically, numerically, chronologically or by subject. An electronic system stores files on drives arranged in a hierarchy of folders and sub-folders, protected by passwords and backups (Caribbean Examinations Council [CXC], 2024; Small, 2026). Electronic files can be found quickly and shared, but depend on electricity and careful naming (Jacob & Augustine, 2012).

Poor filing affects both staff and clients. A slow or lost file delays service, misfiled papers waste staff time, and paper records take up costly space. Offices must also keep certain records for set periods and then archive or dispose of them securely, so weak systems can lead to legal problems (Shepherd & Yeo, 2003).

### 1.5 Purpose of the Research

This study aims to compare the manual and electronic filing systems of professional offices in Georgetown, measuring how quickly files are retrieved and identifying the problems each system causes, so that improvements can be recommended.

## Phase 2: Method of Investigation

### 2.1 Type of Research

Qualitative research was used, supported by simple measurements. Interviews and observation give detailed descriptions of how each office organises, protects and disposes of files, which a short questionnaire could not capture, while timing one retrieval adds a fair, measurable comparison.

### 2.2 Population and Sampling Procedure

The population was the office managers and filing clerks of professional offices in Georgetown. Purposive sampling, which deliberately selects cases that can give the information needed, was used: two offices of each type were chosen, giving six offices (two law offices, two medical offices and two real-estate agencies) (Table 2). Of eight offices invited, the first two of each type to agree were visited, so every type was represented equally.

### 2.3 Data Collection Instrument and Procedure

An interview schedule of ten open questions (Appendix C) covers Research Questions 1 and 3, and an observation checklist (Appendix D) records labelling, security and damage and times the retrieval of a dummy or non-confidential file for Research Question 2. Each office was visited once between 2 and 6 February 2026; no client or patient record was opened.

## Phase 3: Presentation and Discussion of Findings

### 3.1 Presentation of Findings

Observations were entered in Microsoft Excel (one row per office) and summarised with COUNTIF, COUNTIFS, COUNTA, AVERAGE, MIN, MAX and percentage formulae (Appendix E).

**Table 1**

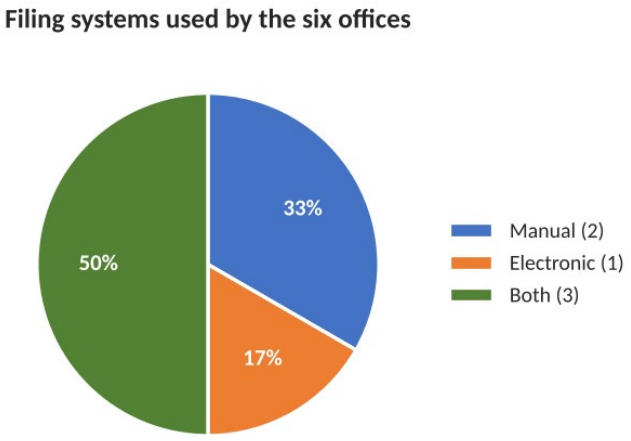

*Filing Systems Used by the Six Offices*

| Filing system | Offices | % of offices |
|---|---|---|
| Manual | 2 | 33.3% |
| Electronic | 1 | 16.7% |
| Both | 3 | 50.0% |
| **Total** | **6** | **100.0%** |

*Note.* n = 6. Counts calculated with COUNTIF and percentages with =count/n in Excel (see Appendix E).

**Figure 1**

*Filing Systems Used by the Six Offices*

*Note.* Share of the six offices (from Table 1).

**Table 2**

*Filing System by Type of Office*

| Type of office | Manual | Electronic | Both | Total |
|---|---|---|---|---|
| Law | 1 | 0 | 1 | 2 |
| Medical | 1 | 0 | 1 | 2 |
| Real estate | 0 | 1 | 1 | 2 |
| **Total** | **2** | **1** | **3** | **6** |

*Note.* Counts by COUNTIFS; row totals by =B+C+D and column totals by SUM (Appendix E).

**Table 3**

*Main Classification Method*

| Classification method | Offices | % of offices |
|---|---|---|
| Alphabetical | 2 | 33.3% |
| Numerical | 3 | 50.0% |
| Chronological | 0 | 0.0% |
| Subject | 1 | 16.7% |
| **Total** | **6** | **100.0%** |

*Note.* n = 6. Counts calculated with COUNTIF and percentages with =count/n in Excel (see Appendix E).

**Table 4**

*Observed Time to Retrieve a Requested File at Each Office (Seconds)*

| Office | Type | System | Manual (s) | Electronic (s) |
|---|---|---|---|---|
| L1 | Law | Manual | 185 | – |
| L2 | Law | Both | 140 | 42 |
| M1 | Medical | Manual | 210 | – |
| M2 | Medical | Both | 125 | 35 |
| R1 | Real estate | Electronic | – | 28 |
| R2 | Real estate | Both | 95 | 47 |

*Note.* Timed with a stopwatch from the request until the file was in hand or open on screen; – = system not used. Offices are identified by code only.

**Table 5**

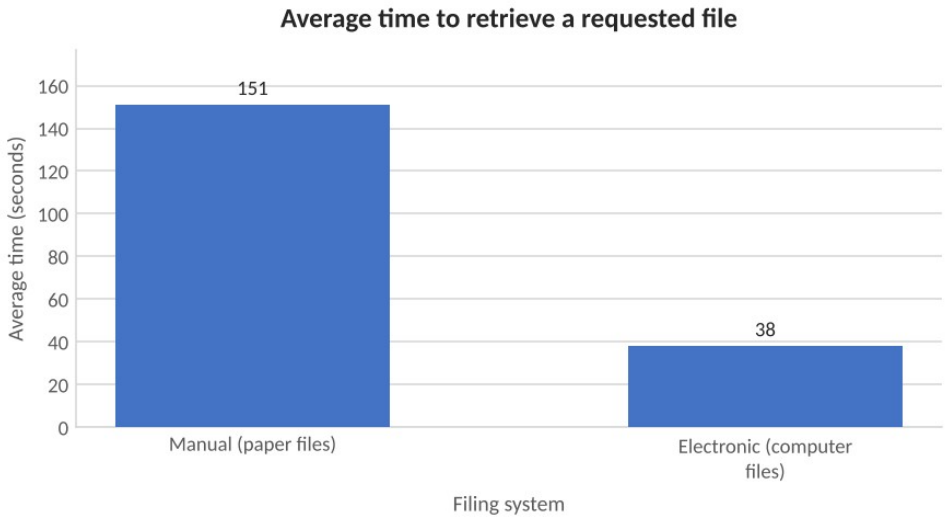

*Average Time to Retrieve a Requested File, by System*

| System | Offices timed | Average time (seconds) | Fastest (seconds) | Slowest (seconds) |
|---|---|---|---|---|
| Manual (paper files) | 5 | 151 | 95 | 210 |
| Electronic (computer files) | 4 | 38 | 28 | 47 |

*Note.* Calculated with COUNTA, AVERAGE, MIN and MAX on the timing columns (Appendix E).

**Figure 2**

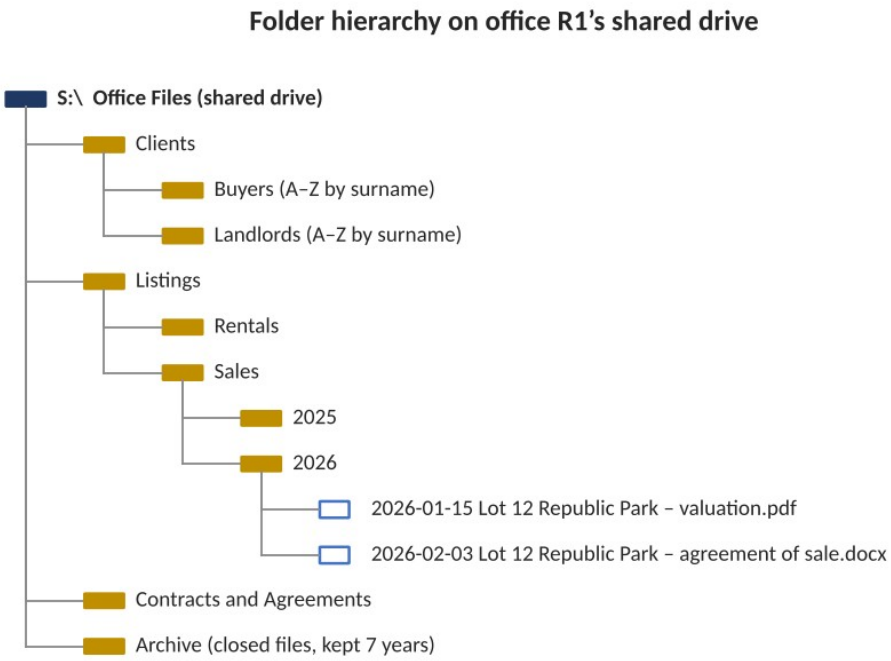

*Average Time to Retrieve a Requested File, by Filing System*

*Note.* From Table 5.

**Figure 3**

*Folder Hierarchy on Office R1's Shared Drive*

*Note.* Drawn from the observation at office R1: client and listing folders sub-divided by type and year; files named with the date first.

**Table 6**

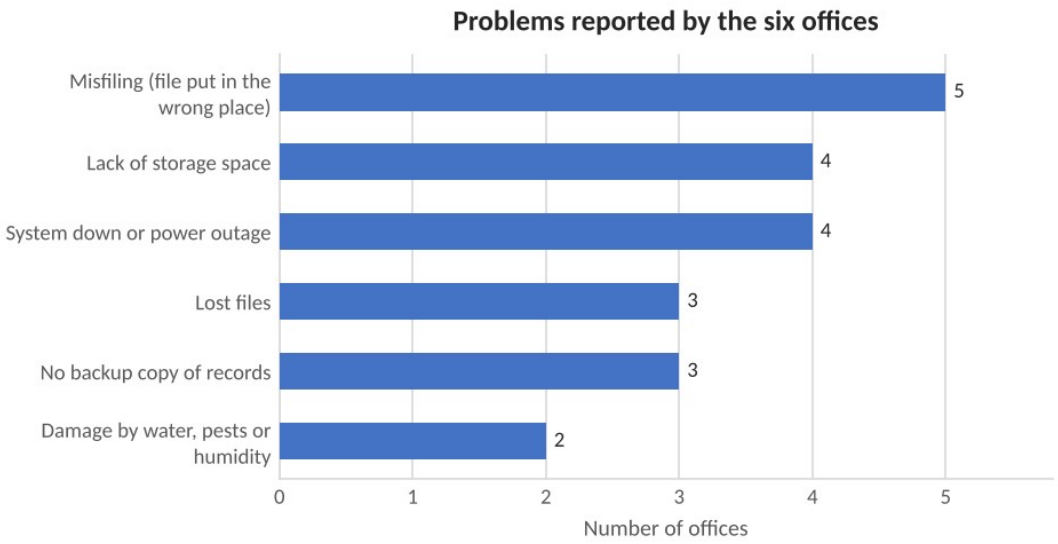

*Problems Reported by Each Office (1 = Reported)*

| Problem | L1 | L2 | M1 | M2 | R1 | R2 | Offices | % of offices |
|---|---|---|---|---|---|---|---|---|
| Misfiling (file put in the wrong place) | 1 | 1 | 1 | 0 | 1 | 1 | 5 | 83.3% |
| Lack of storage space | 1 | 1 | 1 | 1 | 0 | 0 | 4 | 66.7% |
| System down or power outage | 0 | 1 | 0 | 1 | 1 | 1 | 4 | 66.7% |
| Lost files | 1 | 0 | 1 | 0 | 0 | 1 | 3 | 50.0% |
| No backup copy of records | 1 | 0 | 1 | 0 | 0 | 1 | 3 | 50.0% |
| Damage by water, pests or humidity | 1 | 0 | 1 | 0 | 0 | 0 | 2 | 33.3% |

*Note.* Each 1 or 0 is a COUNTIFS result; Offices = sum of the row; % = Offices ÷ 6.

**Figure 4**

*Problems Reported by the Six Offices*

*Note.* Number of offices reporting each problem (from Table 6).

**Table 7**

*Security Measures in Use*

| Security measure | Offices | % of offices |
|---|---|---|
| Locked cabinets or room | 5 | 83.3% |
| Passwords on computers and folders | 4 | 66.7% |
| Regular backups | 3 | 50.0% |

*Note.* n = 6. Counts calculated with COUNTIF and percentages with =count/n in Excel (see Appendix E).

**Table 8**

*Average Period Closed Files Are Kept, by Type of Office*

| Type of office | Offices | Average years kept |
|---|---|---|
| Law | 2 | 12 |
| Medical | 2 | 10 |
| Real estate | 2 | 7 |

*Note.* Average by AVERAGEIF on the retention column; offices counted by COUNTIF.

**Table 9**

*Retention, Archiving and Disposal at Each Office*

| Office | Closed files kept | Archived in | Disposal method |
|---|---|---|---|
| L1 | 12 years | Back storage room | Shredding |
| L2 | 12 years | Off-site storage boxes | Shredding |
| M1 | 10 years | Back storage room | Shredding |
| M2 | 10 years | Back storage room | Shredding |
| R1 | 7 years | Cloud archive folder | Deleted |
| R2 | 7 years | External hard drive | No set method |

*Note.* From interview Questions 5 and 6.

### 3.2 Discussion of Findings

**Research Question 1.** Half of the offices (3 of 6) use both systems, 2 use paper only and 1 is fully electronic (Table 1, Figure 1). Both paper-only offices were a law and a medical office, while a real-estate agency was the only fully electronic office (Table 2). Numerical classification by file or patient number was most common (Table 3).

**Research Question 2.** Electronic retrieval was much faster: an average of 38 seconds compared with 151 seconds for paper files, about 4 times quicker (Table 5, Figure 2). Even within the three offices using both systems, every electronic retrieval beat the paper one (Table 4).

**Research Question 3.** Misfiling was the most common problem (5 offices), followed by lack of storage space and power outages (4 each) (Table 6, Figure 4). Closed files are kept for 12 years in law offices, 10 in medical offices and 7 in real-estate agencies, half of them in back storage rooms, and only 3 offices make regular backups (Table 7, Table 8, Table 9).

### 3.3 Analysis and Interpretation

Electronic filing is clearly faster, but each system has its own risks. Paper-only offices reported storage, damage and lost-file problems, while offices using computers were affected by power outages. Lost files occurred only where there was no backup, linking security directly to the loss of records. Misfiling affected five of six offices whatever the system, showing that consistent classification and naming matter as much as technology, as office R1’s well-named folder hierarchy shows (Figure 3). Generally, offices that combine both systems gain speed but still carry the costs of paper storage.

### 3.4 Recommendations and Implementation Strategy

1. Paper-only offices should scan active files into a clear folder hierarchy, named date-first, keeping paper only where the law requires originals.
2. Every office should make a weekly backup to an external drive or cloud service and use an uninterruptible power supply to protect electronic records during outages.

**Implementation strategy:** In April 2026 our group will give each office manager a one-page summary and a sample folder plan. Each manager will name one clerk to scan active files from May to August 2026, set up weekly backups by 31 May 2026, and review misfiling at the end of September 2026.

## Conclusion

Most offices studied use both manual and electronic filing. Electronic retrieval took about a quarter of the time of paper retrieval, yet misfiling, lack of space, power outages and missing backups remain common. Scanning active files into a well-planned folder hierarchy and backing up regularly would make filing in Georgetown offices faster and safer.

# Appendices

## Appendix A: Permission Letter

*The same letter, addressed individually, was delivered to the office manager of each of the six offices; one copy is shown.*

**CORALSTONE COLLEGE**
Camp Street, Georgetown, Guyana
Telephone: (592) 226-0185 | E-mail: office@coralstonecollege.edu.gy

19 January 2026

Ms Sharmila Ramdass
Office Manager
Riverside Chambers
Croal Street
Georgetown
GUYANA

Dear Ms Ramdass

**REQUEST FOR PERMISSION TO STUDY YOUR OFFICE'S FILING SYSTEM**

We are Aliyah Persaud, Devon Fraser and Krystal Hinds, Form 5 students of Coralstone College. As part of our CSEC Electronic Document Preparation and Management (EDPM) School-Based Assessment, we are comparing the manual and electronic filing systems used by professional offices in Georgetown.

The purpose of the study is to find out how offices organise their files, how long it takes to retrieve a file and what problems each system causes, so that practical improvements can be suggested.

We request permission to visit your office for about 45 minutes between 2 and 6 February 2026 to interview you or your filing clerk (ten questions) and to complete a short observation checklist. We would also like to time the retrieval of one dummy or non-confidential file, once from paper files and once from the computer if both are used.

We will not open, read or copy any client or patient record. Your office will be identified in our report only by a code such as "Law office 1", results will be reported as totals, and our notes will be shredded after the report has been marked.

If you have any questions, please contact me at aliyah.persaud@coralstonecollege.edu.gy or our EDPM teacher, Ms Rhonda Benjamin, at the school telephone number above. Copies of the interview schedule and checklist are enclosed. Thank you for considering our request.

Yours sincerely

Aliyah Persaud
Group Leader, Form 5 EDPM Research Group

Group members: Devon Fraser and Krystal Hinds

Enc 2
c Ms Rhonda Benjamin, EDPM Teacher

## Appendix B: Schedule of Activities (Workplan)

The group followed this schedule of activities from January to March 2026.

| Date | Activity | Comments / follow-up action |
|---|---|---|
| 12 Jan 2026 | Formed the group, chose the topic and agreed the title | Teacher approved the title on 14 January. |
| 13–16 Jan 2026 | Read background sources; wrote the research questions | Recorded full APA details of each source. |
| 19 Jan 2026 | Delivered permission letters to eight offices | Six agreed by 26 January (two of each type). |
| 20–23 Jan 2026 | Designed the interview schedule and observation checklist | Teacher checked the items against the research questions. |
| 27 Jan 2026 | Pilot-tested both instruments in the school office | Added a dummy-file timing step to the checklist. |
| 2–6 Feb 2026 | Visited the six offices: interviews, observations and timing | One visit moved to 6 February; notes typed the same day. |
| 9–13 Feb 2026 | Entered observations in Excel; built formulae, charts and the folder diagram | Timings checked against the stopwatch notes. |
| 16–20 Feb 2026 | Wrote the discussion, analysis and recommendations | Linked every point to a table or figure. |
| 23 Feb–4 Mar 2026 | Wrote the first draft; teacher feedback | Added retention details to the discussion. |
| 9–11 Mar 2026 | Final edit; references, contents page and appendices | Checked APA style and word count. |
| 13 Mar 2026 | Submitted the report | Thank-you letters sent to the six offices. |

**Appendix C: Interview Schedule**

## Interview Schedule: Office Manager or Filing Clerk

Interviewer: thank the participant, explain the purpose of the study and confirm that the office will be identified only by a code. Do not ask to see client or patient records. Time allowed: 25 minutes. Write brief notes for each question.

Office code: _____ Type of office: _____ Date: _____

1. Does the office keep its files on paper, on computer, or both?

   _____

   _____

2. How are files classified (alphabetical, numerical, chronological or by subject), and why?

   _____

   _____

3. How are the cabinets and drawers, or the drives and folders, organised?

   _____

   _____

4. Who is allowed to file and to take out files? How are borrowed files tracked?

   _____

   _____

5. How long are closed files kept before they are archived, and where is the archive?

   _____

   _____

6. How are old files disposed of when they are no longer needed?

   _____

   _____

7. How are files protected from loss, damage and unauthorised access (locks, passwords, backups)?

   _____

   _____

8. What problems does the office have with its filing (space, misfiling, damage, lost files, power cuts)?

   _____

   _____

   _____

9. Has a file ever been lost or misplaced? What happened and how was it solved?

_____

_____

10. What changes would you like to make to the filing system?

_____

_____

*Thank the participant for taking part.*

## Appendix D: Observation Checklist

### Observation Checklist and File-Retrieval Timing

Office code: _____ Observer: _____ Date: _____ Time: _____

| Feature observed | Yes | No | Notes |
|---|---|---|---|
| 1. Cabinets and drawers are clearly labelled | ☐ | ☐ | |
| 2. Folders are labelled in the same way | ☐ | ☐ | |
| 3. Files are in the correct order (sample of 10 checked) | ☐ | ☐ | |
| 4. Out-guides or a register track borrowed files | ☐ | ☐ | |
| 5. Computer folders are named consistently | ☐ | ☐ | |
| 6. Computers and folders need a password | ☐ | ☐ | |
| 7. A backup is in use (date of last backup noted) | ☐ | ☐ | |
| 8. Cabinets or the file room are locked | ☐ | ☐ | |
| 9. Signs of damage (water, pests, humidity) | ☐ | ☐ | |

**File-retrieval timing.** Ask the participant to retrieve a dummy or non-confidential file named by the observer. Start the stopwatch when the request is made and stop it when the file is in hand (or open on screen). Repeat on the computer if both systems are used.

| System | File requested | Time (seconds) | Comments |
|---|---|---|---|
| Manual (paper) | | | |
| Electronic (computer) | | | |

*Do not open, read or copy any client or patient record.*

## Appendix E: Spreadsheet Formulae

The findings were entered in Microsoft Excel (sheet *Observations*, one row per office) and summarised on the *Summary* sheet. Every count, total, average and percentage in the tables and charts is calculated by a formula; the main formulae are listed below (cell references are on the *Summary* sheet).

| Table | Column / item | Cell | Formula |
|---|---|---|---|
| – | Number of offices | B3 | =COUNTA(Observations!$A$2:$A$7) |
| Table 1 | Offices (first row, then copied down) | B7 | =COUNTIF(Observations!$C$2:$C$7,"Manual") |
| Table 1 | % of offices (first row, then copied down) | C7 | =B7/Summary!$B$3 |
| Table 1 | Offices (total row) | B10 | =SUM(B7:B9) |
| Table 1 | % of offices (total row) | C10 | =B10/B$10 |
| Table 2 | Manual (first row, then copied down) | B14 | =COUNTIFS(Observations!$B$2:$B$7,"Law",Observations!$C$2:$C$7,"Manual") |
| Table 2 | Electronic (first row, then copied down) | C14 | =COUNTIFS(Observations!$B$2:$B$7,"Law",Observations!$C$2:$C$7,"Electronic") |
| Table 2 | Both (first row, then copied down) | D14 | =COUNTIFS(Observations!$B$2:$B$7,"Law",Observations!$C$2:$C$7,"Both") |
| Table 2 | Total (first row, then copied down) | E14 | =B14+C14+D14 |
| Table 2 | Manual (total row) | B17 | =SUM(B14:B16) |
| Table 2 | Electronic (total row) | C17 | =SUM(C14:C16) |
| Table 2 | Both (total row) | D17 | =SUM(D14:D16) |
| Table 2 | Total (total row) | E17 | =SUM(E14:E16) |
| Table 3 | Offices (first row, then copied down) | B21 | =COUNTIF(Observations!$D$2:$D$7,"Alphabetical") |
| Table 3 | % of offices (first row, then copied down) | C21 | =B21/Summary!$B$3 |
| Table 3 | Offices (total row) | B25 | =SUM(B21:B24) |
| Table 3 | % of offices (total row) | C25 | =B25/B$25 |
| Table 5 | Offices timed (first row, then copied down) | B29 | =COUNTA(Observations!$E$2:$E$7) |
| Table 5 | Average time (seconds) (first row, then copied down) | C29 | =AVERAGE(Observations!$E$2:$E$7) |
| Table 5 | Fastest (seconds) (first row, then copied down) | D29 | =MIN(Observations!$E$2:$E$7) |
| Table 5 | Slowest (seconds) (first row, then copied down) | E29 | =MAX(Observations!$E$2:$E$7) |
| Table 6 | L1 (first row, then copied down) | B35 | =COUNTIFS(Observations!$A$2:$A$7,"L1",Observations!$M$2:$M$7,"Yes") |
| Table 6 | L2 (first row, then copied down) | C35 | =COUNTIFS(Observations!$A$2:$A$7,"L2",Observations!$M$2:$M$7,"Yes") |
| Table 6 | M1 (first row, then copied down) | D35 | =COUNTIFS(Observations!$A$2:$A$7,"M1",Observations!$M$2:$M$7,"Yes") |

| Table | Column / item | Cell | Formula |
|---|---|---|---|
| Table 6 | M2 (first row, then copied down) | E35 | =COUNTIFS(Observations!$A$2:$A$7,"M2",Observations!$M$2:$M$7,"Yes") |
| Table 6 | R1 (first row, then copied down) | F35 | =COUNTIFS(Observations!$A$2:$A$7,"R1",Observations!$M$2:$M$7,"Yes") |
| Table 6 | R2 (first row, then copied down) | G35 | =COUNTIFS(Observations!$A$2:$A$7,"R2",Observations!$M$2:$M$7,"Yes") |
| Table 6 | Offices (first row, then copied down) | H35 | =B35+C35+D35+E35+F35+G35 |
| Table 6 | % of offices (first row, then copied down) | I35 | =H35/Summary!$B$3 |
| Table 7 | Offices (first row, then copied down) | B44 | =COUNTIF(Observations!$J$2:$J$7,"Yes") |
| Table 7 | % of offices (first row, then copied down) | C44 | =B44/Summary!$B$3 |
| Table 8 | Offices (first row, then copied down) | B50 | =COUNTIF(Observations!$B$2:$B$7,"Law") |
| Table 8 | Average years kept (first row, then copied down) | C50 | =AVERAGEIF(Observations!$B$2:$B$7,"Law",Observations!$G$2:$G$7) |
