Sample solution

Backup and password habits of secondary students

Organisation: Form 4 and Form 5 students at a secondary school in Barbados (generic)
Portfolio element: EDPM Research Assignment – Research Paper
Scenario: research-4

Model answer · Teacher's Version

How this meets the marking criteria

Criterion	Marks	Where it is met in this solution
Phase 1 – Selection of topic/title: topic on backup and password practices among students is focused and suitably titled	1	Title page; 1.1 (p. 1): focused topic and formal title on backup and password practices of Form 4 and Form 5 students.
Permission letter to the principal of the school: formatting and layout (letterhead, date, inside address, salutation, subject heading, complimentary close, signature block)	2	Appendix A (p. 10): letterhead, date, inside address, salutation, bold subject heading, close and signature block; fully blocked, open punctuation.
Permission letter content: identifies the researchers, the school and the purpose of the research	1	Appendix A (p. 10), paragraph 1: the three researchers, the school and the purpose.
Permission letter content: states what participants will do, the confidentiality of responses and contact details	2	Appendix A (p. 10): 40 randomly chosen students complete an anonymous 14-item questionnaire in form time; anonymity, totals only, forms shredded; telephone and e-mail.
Schedule of activities: table with Date, Activity and Comments headings and eight activities listed; relevant sequence with comments/follow-up actions	5	Appendix B (p. 11): Date, Activity, Comments; 12 activities in order, each with a follow-up comment.
Research questions relevant to backup and password practices among students and clearly stated	2	1.3 (p. 1): three numbered questions on backup frequency and location, password practices and lost work.
Background: general description of file security, passwords and backup systems; rationale highlighting the impact on students (lost SBA work, missed deadlines, hacked accounts) and teachers	3	1.4 (p. 1): file security, integrity measures, passwords and backups described; lost SBA work, missed deadlines, hacked accounts and teachers' extra work explained.
Background: at least three reputable sources used	2	1.4 (p. 1): four sources cited (CXC; CISA; Jacob & Augustine; Small).
Purpose of research clearly stated, appropriate and relevant to the topic	2	1.5 (p. 1): one clear purpose statement tied to the research questions.
Phase 2 – Method of research identified (quantitative survey) and justified	2	2.1 (p. 2): quantitative survey named and justified.
Sampling procedure identified and described; selection of sample population (40 students (20 Form 4, 20 Form 5)) explained	3	2.2 (p. 2): stratified random sampling described (two strata by form; random number generator) and selection of 20 + 20 students explained.
Data collection instrument (questionnaire): clearly stated, well-sequenced items that address all research questions	4	2.3 (p. 2); Appendix C: anonymous 14-item questionnaire in sections mapped to the questions; never asks for a password.
Phase 3 – Findings presented in at least two different forms, each appropriately labelled and titled	4	3.1 (p. 2): nine tables, a pie chart, a column chart, a clustered bar chart and a column chart, all numbered and titled.
Tables, charts and graphs show accurate data and use formulae for totals and percentages	2	COUNTIF, COUNTIFS, IF/OR, SUM and % formulae, checked by recalculation; Appendix D (p. 14); workbook Summary and Formula view sheets.
Discussion of findings aligned with the research questions with adequate supporting data	4	3.2 (p. 7): one paragraph per research question with counts and percentages.
Analysis/interpretation: relevant generalisations, linkages, connections and comparisons based on the data	3	3.3 (p. 7): compares Form 4 with Form 5 and links lost work and recovery to backup frequency and hacking to password sharing.
Two recommendations relevant to the findings and one relevant implementation strategy	4	3.4 (p. 7): two numbered recommendations and a who/what/when strategy.
Referencing: accurate APA style, two or more references, in-text citation	6	References (p. 9): four APA 7 entries, hanging indents; citations in 1.4.
Phase 4 – Writing skills: organisation and paragraphing, use of language, spelling and grammar	4	Formal register, focused paragraphs, numbered headings; 967-word body (limit 1000).
Written report layout with four elements such as cover page, acknowledgements, table of contents, references and appendices	4	Cover page, acknowledgements, contents, page numbers, references and appendices.
Total	**60**	**Every criterion is met in full.**

Files in this pack: research-4 - Sample solution.pdf; Research report - Student backup and password practices.docx; Findings data and charts - Student backup and password practices.xlsx.

Phase 3 uses sample findings; every figure comes from workbook formulae, checked by recalculation. Page numbers are the report's own.

FLAMBOYANT HEIGHTS COLLEGE

St. Michael, Barbados

An Investigation into Backup and Password Practices among Form 4 and Form 5 Students at a Secondary School in Barbados

A research paper presented to the Caribbean Examinations Council in partial fulfilment of the requirements for the Caribbean Secondary Education Certificate® (CSEC®) in Electronic Document Preparation and Management (EDPM): School-Based Assessment – Research Assignment

Prepared by

Group member	Candidate number
Tia Best	0200340011
Jamal Gittens	0200340028
Shanice Boyce	0200340035

School	Flamboyant Heights College
Centre code	020034
Territory	Barbados
Subject teacher	Mrs Michelle Thorne
Year of examination	2026
Date submitted	13 March 2026

Acknowledgements

We thank our EDPM teacher, Mrs Michelle Thorne, for her guidance, and the Principal of Flamboyant Heights College, Mr Andre Greaves, for permitting the survey during form time.

We are grateful to the Form 4 and Form 5 form teachers who supervised the questionnaire and to the 40 students who answered honestly. We also thank our families for their encouragement throughout the project.

Phase 1: Planning the Research

1.1 Topic and Title

Every year students lose SBA work when a laptop is stolen, a phone breaks or a USB drive is lost, and some share passwords with friends. The group therefore chose the title: *An Investigation into Backup and Password Practices among Form 4 and Form 5 Students at a Secondary School in Barbados*.

1.2 Permission and Schedule of Activities

A permission letter was sent to the Principal (Appendix A). The schedule of activities (Appendix B) lists 12 activities from 8 January to 13 March 2026.

1.3 Research Questions

1. How often do Form 4 and Form 5 students back up their schoolwork, and where do they store the backups?
2. What password practices do students follow for their school and personal accounts?
3. How many students have lost schoolwork, and what caused the loss?

1.4 Background

File security protects documents from loss, damage and unauthorised access. The integrity of files is kept through overwrite protection (read-only files), restricted access, virus protection and encryption, while cyber and physical security rely on passwords, firewalls, backup systems and disaster recovery (Caribbean Examinations Council [CXC], 2024; Small, 2026). A backup is a copy kept on a different device or in a different place so that work can be restored (Jacob & Augustine, 2012), and strong passwords should be long, random and unique for every account (Cybersecurity and Infrastructure Security Agency [CISA], n.d.).

Students without backups lose SBA work and miss deadlines when devices fail, and shared or reused passwords let accounts be hacked. Teachers then spend time granting extensions and re-marking redone work, so poor habits affect the whole school (CXC, 2024).

1.5 Purpose of the Research

This study aims to find out how often students back up their schoolwork, where they store backups, how they protect their accounts and why work is lost, so that the school can plan a digital-safety campaign before SBA deadlines.

Phase 2: Method of Investigation

2.1 Type of Research

A quantitative survey was used because counts and percentages from an anonymous questionnaire can be compared fairly between Form 4 and Form 5 and presented in charts, and anonymity encourages honest answers about passwords.

2.2 Population and Sampling Procedure

The population was all Form 4 and Form 5 students. Stratified random sampling divides a population into groups (strata) and selects randomly from each: the two forms were the strata, and 20 names were drawn from each form's registers using a random number generator, giving 40 students (Table 1). Equal strata allow the two forms to be compared directly.

2.3 Data Collection Instrument and Procedure

The anonymous questionnaire (Appendix C) has 14 closed items: Section B answers Research Question 1, Section C Research Question 2 and Section D Research Question 3, while Section E checks awareness of file-integrity measures. No item asks for a password. Form teachers supervised it during form time on 3 February 2026, and forms were placed in a sealed box.

Phase 3: Presentation and Discussion of Findings

3.1 Presentation of Findings

Answers were entered in Microsoft Excel and summarised with COUNTIF, COUNTIFS, IF, SUM and percentage formulae (Appendix D).

Table 1

Respondents by Form

Form	Students	% of students
Form 4	20	50.0%
Form 5	20	50.0%
Total	**40**	**100.0%**

Note. n = 40. Counts calculated with COUNTIF and percentages with =count/n in Excel (see Appendix D).

Table 2

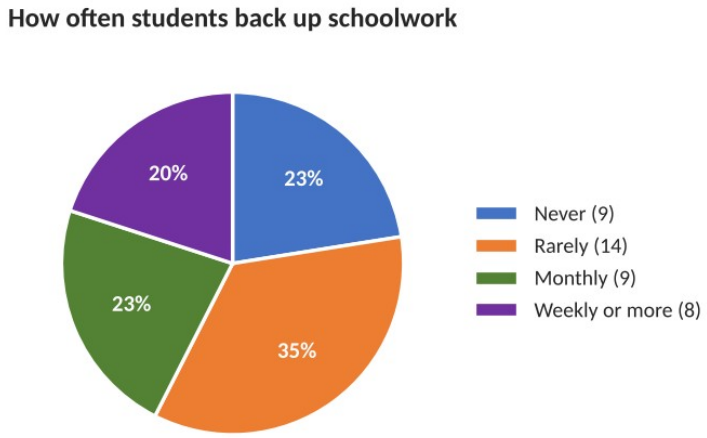

How Often Students Back Up Their Schoolwork, by Form (Item 3)

Backup frequency	Form 4	Form 5	All students	% of all students
Never	6	3	9	22.5%
Rarely	8	6	14	35.0%
Monthly	3	6	9	22.5%
Weekly or more	3	5	8	20.0%
Total	**20**	**20**	**40**	**100.0%**

Note. Counts by COUNTIFS (form and frequency); All = Form 4 + Form 5; % = All ÷ 40 (Appendix D).

Figure 1

How Often Students Back Up Their Schoolwork

Note. Share of all 40 students (from Table 2).

Table 3

Where Students Keep Their Backups (Item 4)

Backup location	Students	% of all students
Cloud storage (for example, OneDrive or Google Drive)	18	45.0%
USB flash drive	15	37.5%
E-mail to myself	9	22.5%
External hard drive	4	10.0%

Note. n = 40. Only students who back up answered and could tick more than one location; % = count ÷ 40.

Table 4

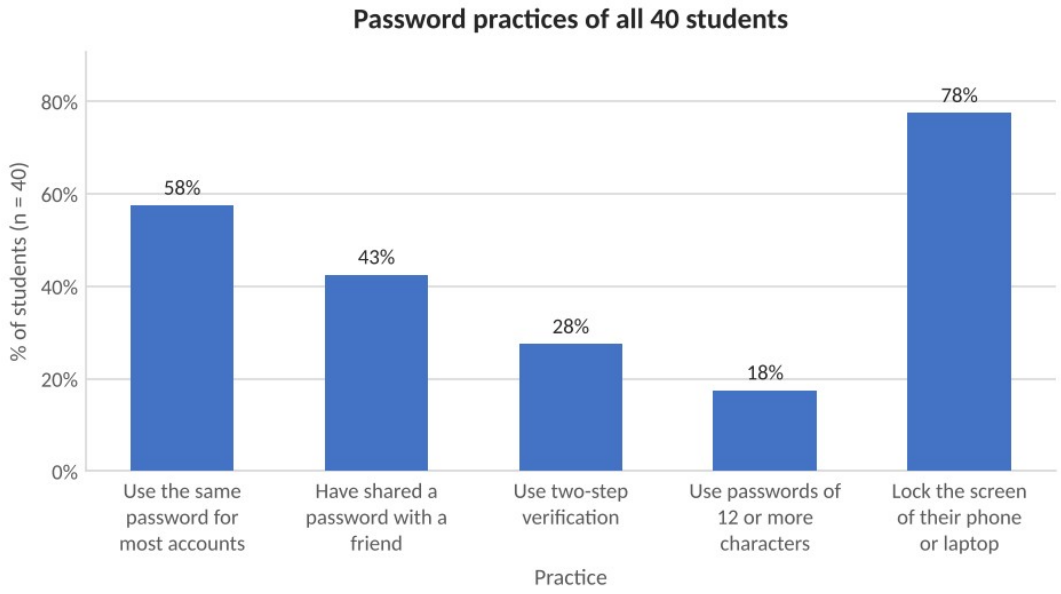

Password Practices by Form (Items 6–10)

Practice	Form 4	Form 5	All students	% of all students
Use the same password for most accounts	13	10	23	57.5%
Have shared a password with a friend	10	7	17	42.5%
Use two-step verification	4	7	11	27.5%
Use passwords of 12 or more characters	2	5	7	17.5%
Lock the screen of their phone or laptop	16	15	31	77.5%

Note. Counts by COUNTIFS; All = Form 4 + Form 5; % = All ÷ 40 (Appendix D).

Figure 2

Password Practices of All Students

Note. Percentage of the 40 students following each practice (from Table 4).

Table 5

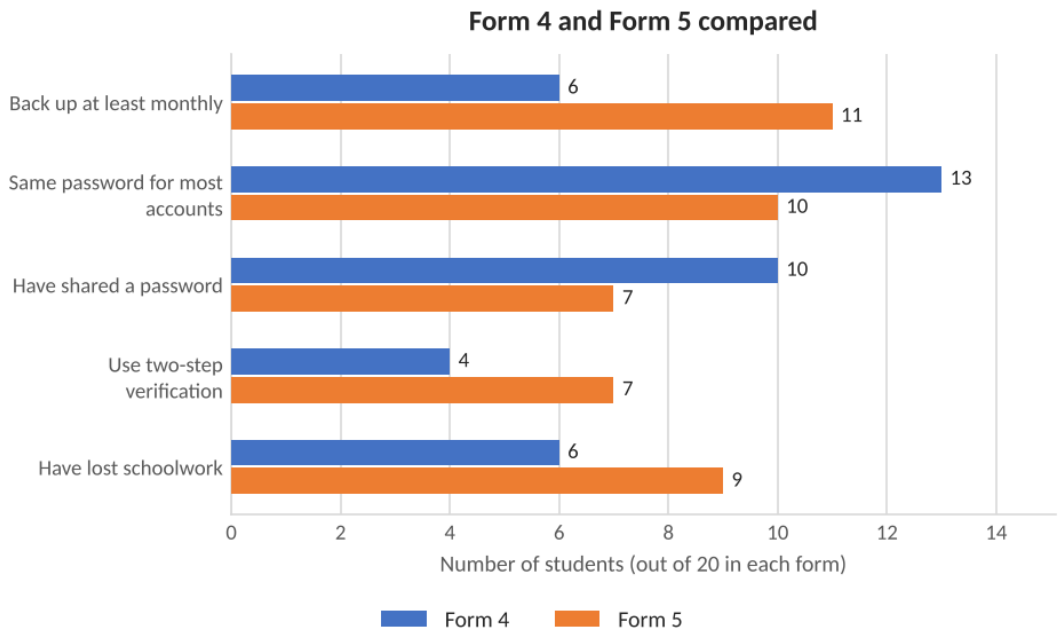

Key Practices Compared: Form 4 and Form 5

Practice	Form 4	Form 5
Back up at least monthly	6	11
Same password for most accounts	13	10
Have shared a password	10	7
Use two-step verification	4	7
Have lost schoolwork	6	9

Note. Counts by COUNTIFS; “at least monthly” uses an IF(OR( )) helper column on the Responses sheet.

Figure 3

Key Practices of Form 4 and Form 5 Students Compared

Note. Number of students out of 20 in each form (from Table 5).

Table 6

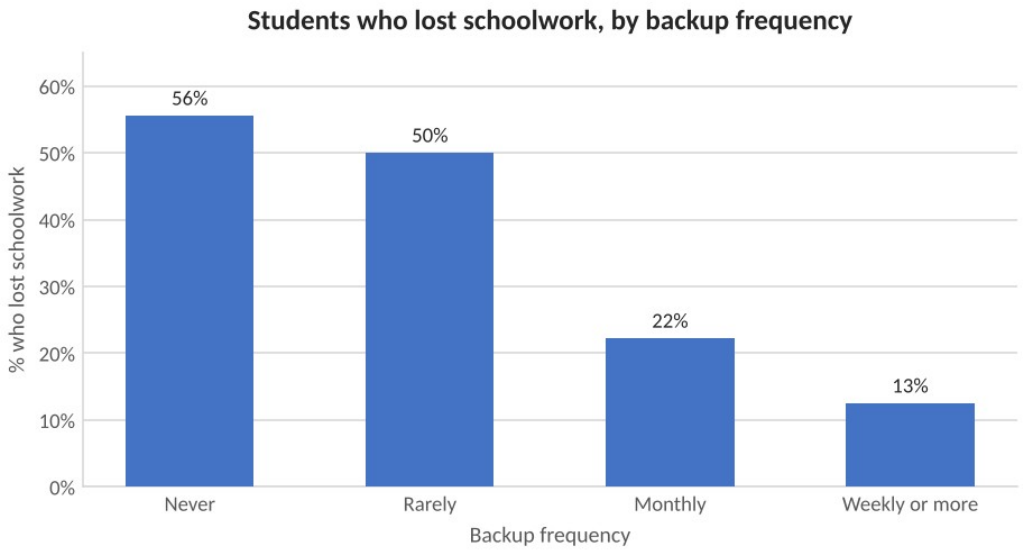

Students Who Have Lost Schoolwork, by Backup Frequency (Items 3 and 11)

Backup frequency	Students	Lost schoolwork	% who lost work
Never	9	5	55.6%
Rarely	14	7	50.0%
Monthly	9	2	22.2%
Weekly or more	8	1	12.5%
Total	**40**	**15**	**37.5%**

Note. Counts by COUNTIF and COUNTIFS; % = students who lost work ÷ students in the row.

Figure 4

Percentage of Students Who Lost Schoolwork, by Backup Frequency

Note. From the last column of Table 6.

Table 7

Main Cause of Lost Schoolwork (Item 12)

Main cause	Students	% of those who lost work
Device broke or was damaged	5	33.3%
USB drive lost or damaged	3	20.0%
Deleted or saved over by mistake	3	20.0%
Device stolen or lost	2	13.3%
Virus or malware	1	6.7%
Account hacked	1	6.7%
Total	**15**	**100.0%**

Note. Only the 15 students who lost work answered; % = count ÷ total (SUM).

Table 8

Whether the Lost Work Was Recovered (Item 13)

Work recovered	Students	% of those who lost work
Fully	3	20.0%
Partly	5	33.3%
Not at all	7	46.7%
Total	**15**	**100.0%**

Note. Only the 15 students who lost work answered; % = count ÷ total (SUM).

Table 9

Awareness of File-Integrity Measures (Item 14)

Measure	Students aware	% of all students
Antivirus software	33	82.5%
Password-protecting or encrypting a file	16	40.0%
Read-only files (overwrite protection)	14	35.0%
Version history	9	22.5%

Note. n = 40. Counts calculated with COUNTIF and percentages with =count/n in Excel (see Appendix D).

3.2 Discussion of Findings

Research Question 1. Over half of the students (23, 57.5%) never or only rarely back up their schoolwork; only 8 back up weekly (Table 2, Figure 1). Cloud storage (18 students) and USB drives (15) are the main backup locations (Table 3). Form 5 backs up more regularly: 11 of 20 at least monthly, against 6 in Form 4 (Table 5, Figure 3).

Research Question 2. Most students (23, 57.5%) reuse one password and 17 (42.5%) have shared one; only 11 use two-step verification and 7 use passwords of 12 or more characters, although 31 lock their screens (Table 4, Figure 2).

Research Question 3. In all, 15 students (37.5%) have lost schoolwork (Table 6). The main causes were a broken or damaged device (5), a lost or damaged USB drive (3) and work deleted or saved over by mistake (3) (Table 7). Only 3 recovered their work fully, while 7 recovered none (Table 8).

3.3 Analysis and Interpretation

Backup habits clearly affect losses: 12 of the 15 students who lost work never or rarely back up, and 55.6% of those who never back up lost work, compared with 12.5% of weekly backers (Table 6, Figure 4); every full recovery was by a student who backs up at least monthly. Form 5 students, who have more SBA work, back up and use two-step verification more, yet still lost more work, which suggests they learned after losing it. USB drives are themselves a cause of loss, and the only hacked account belonged to a student who had shared a password. Generally, awareness of antivirus (33 students) is high, but read-only files and encryption are far less known (Table 9).

3.4 Recommendations and Implementation Strategy

1. Every student should back up schoolwork at least weekly to the school cloud account and one other place, rather than relying on a single USB drive.

2. Students should use a different long passphrase for each account, never share passwords and turn on two-step verification for school accounts.

Implementation strategy: In the week of 20 April 2026, before SBA deadlines, the ICT Department will deliver a 30-minute “Back it up, lock it down” session to every Form 4 and Form 5 class. Form teachers will give a backup reminder every Friday until SBA submission, and the IT technician will enable two-step verification on school accounts by 30 April 2026.

Conclusion

Most students back up rarely or never, reuse passwords and seldom use two-step verification, and over a third have lost schoolwork, mostly through broken devices and lost USB drives. Students who back up regularly lose less and recover more, so a short, practical campaign before SBA deadlines should protect students’ work and accounts.

FLAMBOYANT HEIGHTS COLLEGE
Two Mile Hill, St. Michael, Barbados
Telephone: (246) 555-0123 | E-mail: office@flamboyantheights.edu.bb

14 January 2026

Mr Andre Greaves
Principal
Flamboyant Heights College
Two Mile Hill
St Michael
BARBADOS

Dear Mr Greaves

REQUEST FOR PERMISSION TO SURVEY FORM 4 AND FORM 5 STUDENTS

We are Tia Best, Jamal Gittens and Shanice Boyce, Form 5 students of Flamboyant Heights College. For our CSEC Electronic Document Preparation and Management (EDPM) School-Based Assessment we are investigating the backup and password practices of Form 4 and Form 5 students.

The purpose of the study is to find out how often students back up their schoolwork, where they keep their backups and how they protect their accounts, so that the school can plan a digital-safety campaign before SBA deadlines.

We request permission to select 20 Form 4 and 20 Form 5 students at random from the class registers and to ask them to complete an anonymous questionnaire of 14 tick-box items during form time on 3 February 2026. It takes about ten minutes, and form teachers would supervise.

Taking part is voluntary. The questionnaire does not ask for names, and students will never be asked to write a password. Completed forms will be placed in a sealed box, results will be reported only as totals, and the forms will be shredded after our report has been marked.

If you have any questions, please contact me at (246) 555-0186 or tia.best@flamboyantheights.edu.bb, or our EDPM teacher, Mrs Michelle Thorne, at the school telephone number above. A copy of the questionnaire is enclosed. Thank you for considering our request.

Yours sincerely

Tia Best
Group Leader, Form 5 EDPM Research Group

Group members: Jamal Gittens and Shanice Boyce

Enc Questionnaire
c Mrs Michelle Thorne, EDPM Teacher

Appendix B: Schedule of Activities (Workplan)

The group followed this schedule of activities from January to March 2026.

Date	Activity	Comments / follow-up action
8 Jan 2026	Formed the group, chose the topic and agreed the title	Teacher approved the title on 12 January.
9–13 Jan 2026	Read background sources; wrote the research questions	Recorded full APA details of each source.
14 Jan 2026	Delivered the permission letter to the Principal	Permission granted on 16 January.
15–21 Jan 2026	Designed the questionnaire	Teacher checked that no item asks for a password.
22 Jan 2026	Drew 20 names from each form's registers with a random number generator	Drew three reserve names per form for absentees.
26 Jan 2026	Pilot-tested the questionnaire with four Form 3 students	Added examples to Items 4 and 14.
3 Feb 2026	Administered the questionnaire during form time	Two absentees replaced on 4 February; 40 completed.
9–13 Feb 2026	Entered data in Excel; built formulae, tables and charts	Each entry checked twice against the forms.
16–20 Feb 2026	Wrote the discussion, analysis and recommendations	Compared Form 4 and Form 5 in every section.
23 Feb–4 Mar 2026	Wrote the first draft; teacher feedback	Shortened the background.
9–11 Mar 2026	Final edit; references, contents page and appendices	Checked APA style and word count.
13 Mar 2026	Submitted the report	Summary of findings given to the Principal and ICT Department.

Appendix C: Questionnaire

Questionnaire: Backing Up Schoolwork and Protecting Your Accounts

We are Form 5 students carrying out research for our CSEC EDPM School-Based Assessment. This questionnaire is **anonymous**: do not write your name, and **never write any password** on this form. Your answers will be reported only as totals. Tick ONE box unless the question says "tick all that apply", then place the form in the sealed box.

Section A: About you

1. Which form are you in?
   ☐ Form 4 ☐ Form 5

2. Which devices do you use for schoolwork? (Tick all that apply.)
   ☐ Laptop ☐ Mobile phone ☐ School computers
   ☐ Desktop computer at home ☐ Tablet

Section B: Backing up your schoolwork

3. How often do you make a backup copy of your schoolwork?
   ☐ Never ☐ Rarely ☐ Monthly ☐ Weekly or more

4. If you back up, where do you keep your backups? (Tick all that apply.)
   ☐ Cloud storage (for example, OneDrive or Google Drive) ☐ E-mail to myself
   ☐ USB flash drive ☐ External hard drive

5. Is your backup kept on a different device or in a different place from your original work?
   ☐ Yes ☐ No ☐ I do not back up

Section C: Passwords

6. Do you use the same password for most of your school and personal accounts?
   ☐ Yes ☐ No

7. Have you ever shared a password with a friend?
   ☐ Yes ☐ No

8. Do you use two-step verification (a code sent to your phone) on any account?
   ☐ Yes ☐ No ☐ Not sure

9. About how many characters are in your usual password? (Do not write the password.)
   ☐ Fewer than 8 ☐ 8–11 ☐ 12 or more

10. Do you lock the screen of your phone or laptop with a PIN, password or fingerprint?
    ☐ Yes ☐ No

Section D: Lost work

11. Have you ever lost schoolwork that you had to do again?
    ☐ Yes ☐ No

12. If YES, what was the MAIN cause?

- ☐ Device broke or was damaged
- ☐ Device stolen or lost
- ☐ USB drive lost or damaged
- ☐ Virus or malware
- ☐ Deleted or saved over by mistake
- ☐ Account hacked

13. If YES, were you able to recover the work?

- ☐ Fully
- ☐ Partly
- ☐ Not at all

Section E: Protecting your files

14. Which of these ways of protecting files have you heard of? (Tick all that apply.)

- ☐ Read-only files (overwrite protection)
- ☐ Antivirus software
- ☐ Password-protecting or encrypting a file
- ☐ Version history

Thank you. Please fold this form and place it in the sealed box.

Appendix D: Spreadsheet Formulae

The findings were entered in Microsoft Excel (sheet *Responses*, one row per student) and summarised on the *Summary* sheet. Every count, total, average and percentage in the tables and charts is calculated by a formula; the main formulae are listed below (cell references are on the *Summary* sheet).

Table	Column / item	Cell	Formula
–	Number of students	B3	=COUNTA(Responses!$A$2:$A$41)
Table 1	Students (first row, then copied down)	B7	=COUNTIF(Responses!$B$2:$B$41,"Form 4")
Table 1	% of students (first row, then copied down)	C7	=B7/Summary!$B$3
Table 1	Students (total row)	B9	=SUM(B7:B8)
Table 1	% of students (total row)	C9	=B9/B$9
Table 2	Form 4 (first row, then copied down)	B13	=COUNTIFS(Responses!$B$2:$B$41,"Form 4",Responses!$H$2:$H$41,"Never")
Table 2	Form 5 (first row, then copied down)	C13	=COUNTIFS(Responses!$B$2:$B$41,"Form 5",Responses!$H$2:$H$41,"Never")
Table 2	All students (first row, then copied down)	D13	=B13+C13
Table 2	% of all students (first row, then copied down)	E13	=D13/Summary!$B$3
Table 2	Form 4 (total row)	B17	=SUM(B13:B16)
Table 2	Form 5 (total row)	C17	=SUM(C13:C16)
Table 2	All students (total row)	D17	=SUM(D13:D16)
Table 2	% of all students (total row)	E17	=D17/D$17
Table 3	Students (first row, then copied down)	B21	=COUNTIF(Responses!$I$2:$I$41,"Yes")
Table 3	% of all students (first row, then copied down)	C21	=B21/Summary!$B$3
Table 4	Form 4 (first row, then copied down)	B29	=COUNTIFS(Responses!$B$2:$B$41,"Form 4",Responses!$N$2:$N$41,"Yes")
Table 4	Form 5 (first row, then copied down)	C29	=COUNTIFS(Responses!$B$2:$B$41,"Form 5",Responses!$N$2:$N$41,"Yes")
Table 4	All students (first row, then copied down)	D29	=B29+C29
Table 4	% of all students (first row, then copied down)	E29	=D29/Summary!$B$3
Table 5	Form 4 (first row, then copied down)	B37	=COUNTIFS(Responses!$B$2:$B$41,"Form 4",Responses!$Z$2:$Z$41,"Yes")
Table 5	Form 5 (first row, then copied down)	C37	=COUNTIFS(Responses!$B$2:$B$41,"Form 5",Responses!$Z$2:$Z$41,"Yes")
Table 6	Students (first row, then copied down)	B45	=COUNTIF(Responses!$H$2:$H$41,"Never")
Table 6	Lost schoolwork (first row, then copied down)	C45	=COUNTIFS(Responses!$H$2:$H$41,"Never",Responses!$S$2:$S$41,"Yes")
Table 6	% who lost work (first row, then copied down)	D45	=C45/B45
Table 6	Students (total row)	B49	=SUM(B45:B48)

Table	Column / item	Cell	Formula
Table 6	Lost schoolwork (total row)	C49	=SUM(C45:C48)
Table 6	% who lost work (total row)	D49	=C49/B49
Table 7	Students (first row, then copied down)	B53	=COUNTIF(Responses!$T$2:$T$41,"Device broke or was damaged")
Table 7	% of those who lost work (first row, then copied down)	C53	=B53/B$59
Table 7	Students (total row)	B59	=SUM(B53:B58)
Table 7	% of those who lost work (total row)	C59	=B59/B$59
Table 8	Students (first row, then copied down)	B63	=COUNTIF(Responses!$U$2:$U$41,"Fully")
Table 8	% of those who lost work (first row, then copied down)	C63	=B63/B$66
Table 8	Students (total row)	B66	=SUM(B63:B65)
Table 8	% of those who lost work (total row)	C66	=B66/B$66
Table 9	Students aware (first row, then copied down)	B70	=COUNTIF(Responses!$V$2:$V$41,"Yes")
Table 9	% of all students (first row, then copied down)	C70	=B70/Summary!$B$3
Responses	Backs up at least monthly (formula)	Z2	=IF(OR(H2="Monthly",H2="Weekly or more"),"Yes","No") (copied down)
