Sample solution

Computer-related health problems among office workers in Nassau

Organisation: Office workers in businesses and government offices in Nassau (generic)
Portfolio element: EDPM Research Assignment – Research Paper
Scenario: research-7

Model answer · Teacher's Version

How this meets the marking criteria

Criterion	Marks	Where it is met in this solution
Phase 1 – Selection of topic/title: topic on computer-related health problems and workstation ergonomics among office workers is focused and suitably titled	1	Title page; 1.1 (p. 1): focused topic and formal title on computer-related health problems and workstation ergonomics.
Permission letter to the manager or head of each participating workplace: formatting and layout (letterhead, date, inside address, salutation, subject heading, complimentary close, signature block)	2	Appendix A (p. 9): letterhead, date, inside address, salutation, bold subject heading, close and signature block; fully blocked, open punctuation.
Permission letter content: identifies the researchers, the school and the purpose of the research	1	Appendix A (p. 9), paragraph 1: the three researchers, the school and the purpose.
Permission letter content: states what participants will do, the confidentiality of responses and contact details	2	Appendix A (p. 9): five workers each complete a 15-item questionnaire; desk observed for five minutes; anonymity, totals only, forms shredded; telephone and e-mail.
Schedule of activities: table with Date, Activity and Comments headings and eight activities listed; relevant sequence with comments/follow-up actions	5	Appendix B (p. 10): Date, Activity, Comments; 12 activities in order, each with a follow-up comment.
Research questions relevant to computer-related health problems and workstation ergonomics among office workers and clearly stated	2	1.3 (p. 1): three numbered questions on health problems, workstation set-up and habits that reduce strain.
Background: general description of computer use in offices and the ergonomic principles of a safe workstation; rationale highlighting the impact on office workers (eye strain, neck and back pain, time off work) and on employers (lost productivity, health costs)	3	1.4 (p. 1): office computer use and safe-workstation principles described; eye strain, pain, time off, lost productivity and health costs explained.
Background: at least three reputable sources used	2	1.4 (p. 1): four sources cited (Campbell & Bogle-Graham; CXC; ILO; OSHA).
Purpose of research clearly stated, appropriate and relevant to the topic	2	1.5 (p. 1): one clear purpose statement tied to the research questions.
Phase 2 – Method of research identified (quantitative survey with an observation checklist) and justified	2	2.1 (p. 2): quantitative survey with an observation checklist named and justified.
Sampling procedure identified and described; selection of sample population (40 office workers from 8 workplaces) explained	3	2.2 (p. 2): stratified sampling described (20 private, 20 government; five chosen at random per workplace) and selection of 40 workers from 8 workplaces explained.
Data collection instrument (questionnaire and observation checklist): clearly stated, well-sequenced items that address all research questions	4	2.3 (p. 2); Appendices C and D: 15-item questionnaire (14 closed, 1 open) in sections mapped to the questions and an 8-item observation checklist.
Phase 3 – Findings presented in at least two different forms, each appropriately labelled and titled	4	3.1 (p. 2): nine tables, a bar chart, a pie chart and a column chart, all numbered and titled.
Tables, charts and graphs show accurate data and use formulae for totals and percentages	2	COUNTIF, COUNTIFS, SUM and % formulae, checked by recalculation; Appendix E (p. 14); workbook Summary and Formula view sheets.
Discussion of findings aligned with the research questions with adequate supporting data	4	3.2 (p. 6): one paragraph per research question with counts and percentages.
Analysis/interpretation: relevant generalisations, linkages, connections and comparisons based on the data	3	3.3 (p. 6): links neck pain to monitor height, back pain to chairs and eye strain to hours and eye rest; compares sectors.
Two recommendations relevant to the findings and one relevant implementation strategy	4	3.4 (p. 7): two numbered recommendations and a who/what/when strategy.
Referencing: accurate APA style, two or more references, in-text citation	6	References (p. 8): four APA 7 entries, hanging indents; citations in 1.4.
Phase 4 – Writing skills: organisation and paragraphing, use of language, spelling and grammar	4	Formal register, focused paragraphs, numbered headings; 934-word body (limit 1000).
Written report layout with four elements such as cover page, acknowledgements, table of contents, references and appendices	4	Cover page, acknowledgements, contents, page numbers, references and appendices.
Total	**60**	**Every criterion is met in full.**

Files in this pack: research-7 - Sample solution.pdf; Research report - Computer-related health and ergonomics.docx; Findings data and charts - Computer-related health and ergonomics.xlsx.

Phase 3 uses sample findings; every figure comes from workbook formulae, checked by recalculation. Page numbers are the report's own.

HUMMINGBIRD RIDGE HIGH SCHOOL

Nassau, The Bahamas

An Investigation into Computer-Related Health Problems and Workstation Ergonomics among Office Workers in Nassau

A research paper presented to the Caribbean Examinations Council in partial fulfilment of the requirements for the Caribbean Secondary Education Certificate® (CSEC®) in Electronic Document Preparation and Management (EDPM): School-Based Assessment – Research Assignment

Prepared by

Group member	Candidate number
Deja Rolle	0300260015

Centre code	030026
Territory	The Bahamas
Subject teacher	Mrs Tamika Saunders
Year of examination	2026
Date submitted	13 March 2026

Acknowledgements

We thank our EDPM teacher, Mrs Tamika Saunders, for her guidance, and the Principal of Hummingbird Ridge High School for allowing us to visit workplaces during school hours.

We are grateful to the managers and heads of the four private businesses and four government offices who gave permission and supplied staff lists, and to the 40 office workers who completed our questionnaire and allowed us to observe their workstations. We also thank our parents for transport.

Phase 1: Planning the Research

1.1 Topic and Title

Office staff in Nassau spend most of the working day at a computer, and some complain of sore necks, back pain and tired eyes. The group therefore chose the title: *An Investigation into Computer-Related Health Problems and Workstation Ergonomics among Office Workers in Nassau*.

1.2 Permission and Schedule of Activities

A permission letter was delivered to the manager or head of each workplace (Appendix A). The schedule of activities (Appendix B) lists 12 activities from 6 January to 13 March 2026.

1.3 Research Questions

1. Which computer-related health problems (eye strain, neck and shoulder pain, back pain, wrist pain, headaches) do office workers in Nassau experience?
2. How are their workstations set up (chair, monitor height, keyboard position, lighting)?
3. Which habits, such as regular breaks and stretching, do office workers follow to reduce strain?

1.4 Background

Office workers use computers for most of the day, and the syllabus requires the effects of computer use on health and correct posture at the workstation to be understood (Caribbean Examinations Council [CXC], 2024; Campbell & Bogle-Graham, 2012). Ergonomics fits the workstation to the worker: an adjustable chair that supports the back, the top of the monitor at or slightly below eye level about an arm’s length away, the keyboard at elbow height and lighting without glare (Occupational Safety and Health Administration [OSHA], n.d.).

Poor set-up and long, unbroken periods at the screen cause eye strain, neck, shoulder and back pain and repetitive strain of the wrists, which can lead to time off work. Employers then lose productivity and face higher health costs, although many improvements, such as raising a monitor or scheduling short breaks, cost little (International Labour Office, 2010).

1.5 Purpose of the Research

This study aims to find out how common computer-related health problems are among office workers in Nassau, how their workstations are set up and which habits they follow, so that employers can be advised on simple, low-cost improvements.

Phase 2: Method of Investigation

2.1 Type of Research

A quantitative survey with an observation checklist was used. Closed answers give counts and percentages that can be compared and charted, while observing each desk records the actual set-up instead of relying on workers' opinions.

2.2 Population and Sampling Procedure

The population was office workers who use a computer for at least four hours a day. Stratified sampling divides the population into groups and samples each: the strata were private businesses and government offices. Four workplaces of each type agreed, and five workers were chosen at random from each staff list, giving 40 office workers from 8 workplaces, 20 in each sector (Table 1).

2.3 Data Collection Instrument and Procedure

The anonymous questionnaire (Appendix C) has 14 closed items and one open item: Section B answers Research Question 1, Sections C and D Research Questions 2 and 3. The eight-item observation checklist (Appendix D), completed at each desk, also answers Research Question 2. Data were collected from 2 to 6 February 2026.

Phase 3: Presentation and Discussion of Findings

3.1 Presentation of Findings

Answers and observations were entered in Microsoft Excel and summarised with COUNTIF, COUNTIFS, SUM and percentage formulae (Appendix E).

Table 1

Respondents by Sector

Sector	Workers	% of workers
Private business	20	50.0%
Government office	20	50.0%
Total	**40**	**100.0%**

Note. n = 40. Counts calculated with COUNTIF and percentages with =count/n in Excel (see Appendix E).

Table 2

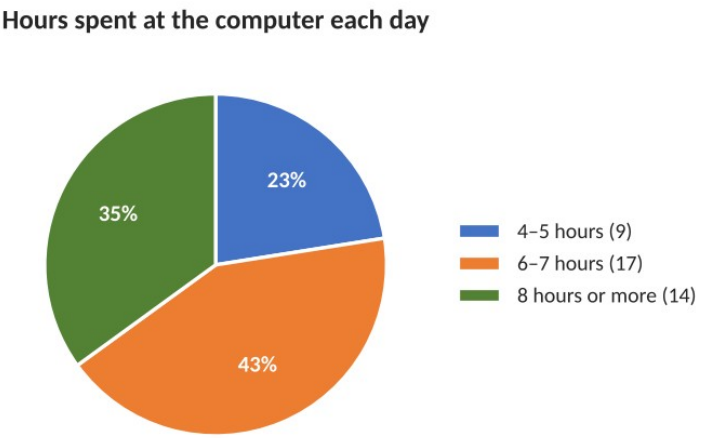

Hours Spent at the Computer on a Normal Working Day (Item 4)

Hours at the computer	Workers	% of workers
4–5 hours	9	22.5%
6–7 hours	17	42.5%
8 hours or more	14	35.0%
Total	**40**	**100.0%**

Note. n = 40. Counts calculated with COUNTIF and percentages with =count/n in Excel (see Appendix E).

Figure 1

Hours Spent at the Computer Each Day

Note. Share of the 40 office workers (from Table 2).

Table 3

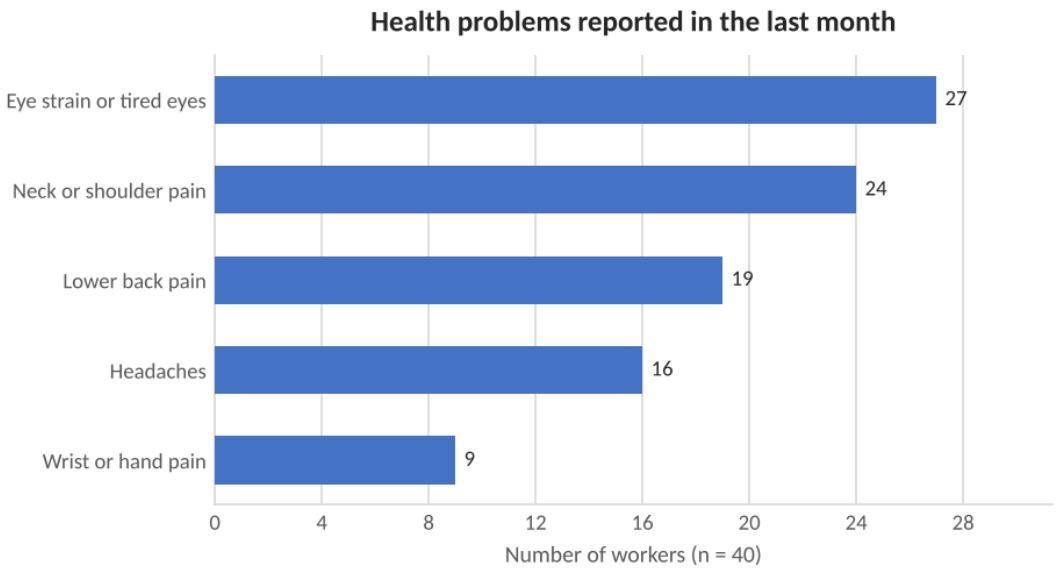

Computer-Related Health Problems in the Last Month (Item 5)

Health problem	Workers	% of workers
Eye strain or tired eyes	27	67.5%
Neck or shoulder pain	24	60.0%
Lower back pain	19	47.5%
Headaches	16	40.0%
Wrist or hand pain	9	22.5%
No problem	4	10.0%

Note. n = 40. Workers could tick more than one problem. Counts by COUNTIF; % = count ÷ n (Appendix E).

Figure 2

Health Problems Reported in the Last Month

Note. Number of workers reporting each problem (from Table 3).

Table 4

How Often the Most Troublesome Problem Occurs (Item 6)

How often	Workers	% of workers with a problem
Daily	11	30.6%
A few times a week	14	38.9%
Weekly	7	19.4%
Rarely	4	11.1%
Total	**36**	**100.0%**

Note. Only the 36 workers with a problem answered; % = count ÷ total (SUM).

Table 5

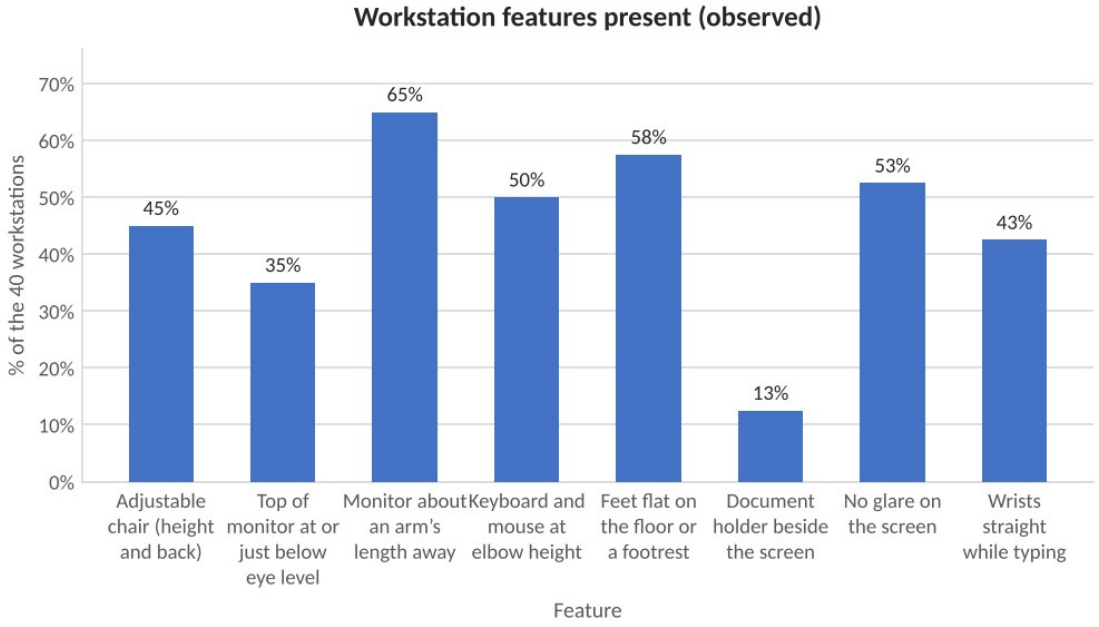

Workstation Features Present, by Sector (Observation Checklist)

Feature observed	Private	Government	All workstations	% of workstations
Adjustable chair (height and back)	12	6	18	45.0%
Top of monitor at or just below eye level	9	5	14	35.0%
Monitor about an arm’s length away	14	12	26	65.0%
Keyboard and mouse at elbow height	11	9	20	50.0%
Feet flat on the floor or a footrest	13	10	23	57.5%
Document holder beside the screen	3	2	5	12.5%
No glare on the screen	11	10	21	52.5%
Wrists straight while typing	9	8	17	42.5%

Note. Counts by COUNTIFS (sector and feature); All = Private + Government; % = All ÷ 40.

Figure 3

Workstation Features Present at the 40 Workstations

Note. From the last column of Table 5.

Table 6

Habits That Reduce Strain (Items 10–12)

Habit	Always or regularly	Sometimes	Never	% never
Short break at least once an hour	8	19	13	32.5%
Stretching during the day	6	17	17	42.5%
Resting the eyes by looking away	9	15	16	40.0%

Note. n = 40. Counts by COUNTIF; % never = Never ÷ n.

Table 7

Health Problems Compared with Workstation Set-up and Hours

Group of workers	Workers in group	With the problem	% with the problem
Neck or shoulder pain – monitor at eye level	14	4	28.6%
Neck or shoulder pain – monitor not at eye level	26	20	76.9%
Lower back pain – adjustable chair	18	5	27.8%
Lower back pain – no adjustable chair	22	14	63.6%
Eye strain – 4–5 hours a day	9	3	33.3%
Eye strain – 8 hours or more a day	14	13	92.9%
Eye strain – never rest their eyes	16	16	100.0%

Note. Counts by COUNTIF and COUNTIFS; % = workers with the problem ÷ workers in the group.

Table 8

Training, Time Off and Reporting (Items 7, 9, 13 and 14)

Finding	Workers	% of workers
Received training on posture or ergonomics	7	17.5%
Reported discomfort to a supervisor	12	30.0%
Took time off work because of a problem	6	15.0%
Work on a laptop without a separate keyboard	7	17.5%

Note. n = 40. Counts calculated with COUNTIF and percentages with =count/n in Excel (see Appendix E).

Table 9

Change That Would Help Most (Item 15, Coded)

Suggested change	Workers	% of workers
Adjustable chair	11	27.5%
Raise the monitor	9	22.5%
Footrest or wrist rest	6	15.0%
Less glare or better lighting	5	12.5%
Reminders to take breaks	4	10.0%
No suggestion	5	12.5%
Total	**40**	**100.0%**

Note. n = 40. Counts calculated with COUNTIF and percentages with =count/n in Excel (see Appendix E).

3.2 Discussion of Findings

Research Question 1. Most workers (36 of 40) reported at least one problem in the last month (Table 3, Figure 2). Eye strain was the most common (27 workers, 67.5%), followed by neck or shoulder pain (60%) and lower back pain (47.5%). Problems occur at least a few times a week for 25 workers, and 6 have taken time off (Table 4, Table 8).

Research Question 2. Long hours are normal: 31 workers (77.5%) spend six hours or more at the computer (Table 2, Figure 1). Only 14 workstations (35%) had the monitor at eye level and 18 an adjustable chair, and just 5 had a document holder (Table 5, Figure 3).

Research Question 3. Healthy habits are uncommon: 8 workers always take hourly breaks, while 42.5% never stretch and 40% never rest their eyes (Table 6). Only 7 have had ergonomics training.

3.3 Analysis and Interpretation

The findings link problems directly to workstation set-up. Neck or shoulder pain affected 76.9% of workers whose monitor was not at eye level, against 28.6% of the others; lower back pain affected 63.6% without an adjustable chair, against 27.8% with one (Table 7). Eye

strain rose with screen time, from 33.3% for four to five hours to 92.9% for eight hours or more. Government offices had fewer adjustable chairs (6 of 20) than private businesses (12). Generally, the commonest problems match the missing features, which workers themselves named first (Table 9).

3.4 Recommendations and Implementation Strategy

1. Employers should make low-cost changes at every desk: raise monitors to eye level with stands, place them an arm’s length away, reduce glare and replace fixed chairs with adjustable ones as they wear out.
2. Employers should give staff a short ergonomics briefing and encourage a break every hour and resting the eyes every 20 minutes.

Implementation strategy: In April 2026 our group will send each of the eight managers a summary and a one-page desk checklist. Each manager will name a staff member to check every workstation and order monitor stands by 29 May 2026, arrange a 30-minute briefing by 30 June 2026, and repeat the checklist in September 2026.

Conclusion

Computer-related health problems, especially eye strain, neck pain and back pain, are common among office workers in Nassau, and they are linked to poorly adjusted monitors and chairs, long screen time and few breaks. Simple, low-cost changes to workstations and habits should reduce pain and time off work.

Appendices

Appendix A: Permission Letter

The same letter, addressed individually, was delivered to the manager or head of each of the eight workplaces; one copy is shown.

HUMMINGBIRD RIDGE HIGH SCHOOL
Prince Charles Drive, Nassau, The Bahamas
Telephone: (242) 555-0164 | E-mail: office@hummingbirdridge.edu.bs

12 January 2026

Mr Kendrick Pinder
Office Manager
Seabreeze Shipping and Logistics Ltd
East Bay Street
Nassau
THE BAHAMAS

Dear Mr Pinder

REQUEST FOR PERMISSION TO SURVEY OFFICE STAFF ABOUT COMPUTER USE AND HEALTH

We are Deja Rolle, Trevor Ferguson and Alexis Knowles, Form 5 students of Hummingbird Ridge High School. For our CSEC Electronic Document Preparation and Management (EDPM) School-Based Assessment we are investigating computer-related health problems and workstation ergonomics among office workers in Nassau.

The purpose of the study is to find out how common problems such as eye strain and back pain are, how workstations are set up and which habits staff follow, so that simple, low-cost improvements can be suggested to employers.

We request a list of staff who use a computer for at least four hours a day, from which we would choose five at random. Each would complete a 15-item questionnaire (about ten minutes), and we would spend five minutes at each desk completing an eight-item checklist. We would visit between 2 and 6 February 2026.

Taking part is voluntary. The questionnaire is anonymous, we will not look at anything on screen, and health information will be reported only as totals for all workplaces, never for a person or a business. The staff list and completed forms will be shredded after our report has been marked.

If you have any questions, please contact me at (242) 555-0181 or deja.rolle@hummingbirdridge.edu.bs, or our EDPM teacher, Mrs Tamika Saunders, at the school telephone number above. Copies of the questionnaire and checklist are enclosed. Thank you for considering our request.

Yours sincerely

Deja Rolle
Group Leader, Form 5 EDPM Research Group

Group members: Trevor Ferguson and Alexis Knowles

Enc 2
c Mrs Tamika Saunders, EDPM Teacher

Appendix B: Schedule of Activities (Workplan)

The group followed this schedule of activities from January to March 2026.

Date	Activity	Comments / follow-up action
6 Jan 2026	Formed the group, chose the topic and agreed the title	Teacher approved the title on 8 January.
7–9 Jan 2026	Read background sources; wrote the research questions	Recorded full APA details of each source.
12 Jan 2026	Delivered permission letters to ten workplaces (five private, five government)	Four of each agreed by 21 January and sent staff lists.
13–20 Jan 2026	Designed the questionnaire and observation checklist	Teacher checked the items against the research questions.
22 Jan 2026	Chose five workers at random from each staff list	Two reserves per workplace for absences.
26 Jan 2026	Pilot-tested both instruments with two school office staff	Added a diagram showing correct monitor height to the checklist.
2–6 Feb 2026	Visited the eight workplaces: questionnaires and desk observations	One worker on leave replaced by a reserve; 40 completed.
9–13 Feb 2026	Entered data in Excel; built formulae, tables and charts	Each entry checked twice.
16–20 Feb 2026	Wrote the discussion, analysis and recommendations	Linked every problem to a workstation feature.
23 Feb–4 Mar 2026	Wrote the first draft; teacher feedback	Shortened the background.
9–11 Mar 2026	Final edit; references, contents page and appendices	Checked APA style and word count.
13 Mar 2026	Submitted the report	Summary and checklist sent to the eight workplaces.

Appendix C: Questionnaire

Questionnaire: Computer Use and Your Health at Work

We are Form 5 students carrying out research for our CSEC EDPM School-Based Assessment. The questionnaire is **anonymous**: do not write your name. Health information will be reported only as totals. Tick ONE box unless the question says "tick all that apply".

Section A: About you

1. Where do you work?
   - ☐ Private business
   - ☐ Government office

2. What is your job role?
   - ☐ Clerical or administrative
   - ☐ Customer service
   - ☐ Accounts or finance
   - ☐ Supervisor or manager

3. How long have you worked in this job?
   - ☐ Less than 2 years
   - ☐ 2–5 years
   - ☐ 6–10 years
   - ☐ More than 10 years

4. How many hours do you spend at the computer on a normal working day?
   - ☐ 4–5 hours
   - ☐ 6–7 hours
   - ☐ 8 hours or more

Section B: Health problems

5. In the last month, which of these problems have you had? (Tick all that apply.)
   - ☐ Eye strain or tired eyes
   - ☐ Headaches
   - ☐ Neck or shoulder pain
   - ☐ Wrist or hand pain
   - ☐ Lower back pain
   - ☐ None of these

6. How often does the problem that troubles you most occur?
   - ☐ Daily
   - ☐ Weekly
   - ☐ A few times a week
   - ☐ Rarely

7. In the past year, has any of these problems caused you to take time off work?
   - ☐ Yes
   - ☐ No

Section C: Your workstation

8. Can you adjust the height and back of your chair?
   - ☐ Yes
   - ☐ No

9. Do you work on a laptop without a separate keyboard or stand?
   - ☐ Yes
   - ☐ No

Section D: Your habits

10. Do you take a short break from the computer at least once every hour?
    - ☐ Always
    - ☐ Sometimes
    - ☐ Never

11. Do you stretch during the working day?
    - ☐ Regularly
    - ☐ Sometimes
    - ☐ Never

12. Do you rest your eyes by looking away from the screen about every 20 minutes?
    - ☐ Regularly
    - ☐ Sometimes
    - ☐ Never

13. Have you received any training on posture or ergonomics?
    ☐ Yes ☐ No

14. Have you ever reported discomfort to your supervisor?
    ☐ Yes ☐ No

15. What ONE change to your workstation would help you most?

    _____

    _____

Thank you for taking part. Please seal this form in the envelope provided.

Appendix D: Workstation Observation Checklist

Workstation Observation Checklist

Workplace code: _____ Worker no.: _____ Observer: _____ Date: _____

Observe the worker at the desk for about five minutes while they work normally. Do not look at the content of the screen. Tick Yes only if the feature is clearly present.

Feature observed	Yes	No	Notes
1. Adjustable chair (height and back)	☐	☐	
2. Top of monitor at or just below eye level	☐	☐	
3. Monitor about an arm’s length away	☐	☐	
4. Keyboard and mouse at elbow height	☐	☐	
5. Feet flat on the floor or a footrest	☐	☐	
6. Document holder beside the screen	☐	☐	
7. No glare on the screen	☐	☐	
8. Wrists straight while typing	☐	☐	

Thank the worker. Total the Yes ticks for this workstation: _____ / 8

Appendix E: Spreadsheet Formulae

The findings were entered in Microsoft Excel (sheet *Responses*, one row per worker) and summarised on the *Summary* sheet. Every count, total, average and percentage in the tables and charts is calculated by a formula; the main formulae are listed below (cell references are on the *Summary* sheet).

Table	Column / item	Cell	Formula
–	Number of office workers	B3	=COUNTA(Responses!$A$2:$A$41)
Table 1	Workers (first row, then copied down)	B7	=COUNTIF(Responses!$C$2:$C$41,"Private business")
Table 1	% of workers (first row, then copied down)	C7	=B7/Summary!$B$3
Table 1	Workers (total row)	B9	=SUM(B7:B8)
Table 1	% of workers (total row)	C9	=B9/B$9
Table 2	Workers (first row, then copied down)	B13	=COUNTIF(Responses!$F$2:$F$41,"4–5 hours")
Table 2	% of workers (first row, then copied down)	C13	=B13/Summary!$B$3
Table 2	Workers (total row)	B16	=SUM(B13:B15)
Table 2	% of workers (total row)	C16	=B16/B$16
Table 3	Workers (first row, then copied down)	B20	=COUNTIF(Responses!$G$2:$G$41,"Yes")
Table 3	% of workers (first row, then copied down)	C20	=B20/Summary!$B$3
Table 4	Workers (first row, then copied down)	B30	=COUNTIF(Responses!$M$2:$M$41,"Daily")
Table 4	% of workers with a problem (first row, then copied down)	C30	=B30/B$34
Table 4	Workers (total row)	B34	=SUM(B30:B33)
Table 4	% of workers with a problem (total row)	C34	=B34/B$34
Table 5	Private (first row, then copied down)	B38	=COUNTIFS(Responses!$C$2:$C$41,"Private business",Responses!$W$2:$W$41,"Yes")
Table 5	Government (first row, then copied down)	C38	=COUNTIFS(Responses!$C$2:$C$41,"Government office",Responses!$W$2:$W$41,"Yes")
Table 5	All workstations (first row, then copied down)	D38	=B38+C38
Table 5	% of workstations (first row, then copied down)	E38	=D38/Summary!$B$3
Table 6	Always or regularly (first row, then copied down)	B49	=COUNTIF(Responses!$Q$2:$Q$41,"Always")
Table 6	Sometimes (first row, then copied down)	C49	=COUNTIF(Responses!$Q$2:$Q$41,"Sometimes")
Table 6	Never (first row, then copied down)	D49	=COUNTIF(Responses!$Q$2:$Q$41,"Never")
Table 6	% never (first row, then copied down)	E49	=D49/Summary!$B$3
Table 7	Workers in group (first row, then copied down)	B55	=COUNTIF(Responses!$X$2:$X$41,"Yes")

Table	Column / item	Cell	Formula
Table 7	With the problem (first row, then copied down)	C55	=COUNTIFS(Responses!$X$2:$X$41,"Yes",Responses!$H$2:$H$41,"Yes")
Table 7	% with the problem (first row, then copied down)	D55	=C55/B55
Table 8	Workers (first row, then copied down)	B65	=COUNTIF(Responses!$T$2:$T$41,"Yes")
Table 8	% of workers (first row, then copied down)	C65	=B65/Summary!$B$3
Table 9	Workers (first row, then copied down)	B72	=COUNTIF(Responses!$V$2:$V$41,"Adjustable chair")
Table 9	% of workers (first row, then copied down)	C72	=B72/Summary!$B$3
Table 9	Workers (total row)	B78	=SUM(B72:B77)
Table 9	% of workers (total row)	C78	=B78/B$78
