The **Table** sheet prints on one A4 landscape page, centred horizontally, with the candidate's name and the label in the footer. The **Formulas** sheet is the formula view (Show Formulas, with gridlines and row and column headings) and prints on page 2.

How this meets the marking criteria

Criterion	Marks	Where it is met in this answer
Selection of appropriate software tool	1 KC	Keyed into Excel worksheet cells on the sheet **Table** (no text boxes or Word table); the main heading is merged and centred across A1:I1, with the subheading merged below it.
Present slanted headings	1 APP	The columnar headings in B4:I4 are set vertically at 90° (Format Cells › Alignment › Orientation) and stay readable; group headings merged and centred: 2025 over B3:E3; 2026 over F3:I3.
Present harmonious colour scheme	1 APP	A harmonious scheme of three related blues only – navy (#1B4F72) for the main heading and subheading, mid blue (#2E86C1) with white text for the year headings and the ALL MARKETS row, and pale blue (#D6EAF8) for the columnar headings and alternate market rows.
Present accurate information	1 APP	All 6 rows keyed exactly and sorted in descending order of 2026 Quarter Total (United States first, Other Markets last), ALL MARKETS kept last; 2025 Quarter Total by =SUM(B5:D5); 2026 Quarter Total by =SUM(F5:H5); ALL MARKETS row by =SUM(...) on every numeric column. Every figure was checked against a LibreOffice recalculation: all six markets keyed in exactly; Quarter Totals and ALL MARKETS row correct (2025 = 168,740; 2026 = 180,350); markets sorted by 2026 Quarter Total, largest first; comma separators, no decimals.
Total	**4**	Every criterion is visibly met; all figures were checked by recalculation.
