Recycling collected by district, 2024 and 2025

Green Isle Recycling Initiative

Ruled Tabulation using Spreadsheet Software

In this download: Recycling by District.xlsx · ruled-5 - Sample solution.pdf

The **Table** sheet prints on one A4 landscape page, centred horizontally, with the candidate's name and the label in the footer. The **Formulas** sheet is the formula view (Show Formulas, with gridlines and row and column headings) and prints on page 2.

How this meets the marking criteria

Criterion	Marks	Where it is met in this answer
Selection of appropriate software tool	1 KC	Keyed into Excel worksheet cells on the sheet **Table** (no text boxes or Word table); the main heading is merged and centred across A1:I1.
Present slanted headings	1 APP	The columnar headings in B3:I3 are set vertically at 90° (Format Cells › Alignment › Orientation) and stay readable; group headings merged and centred: Plastic over B2:C2; Glass over D2:E2; Aluminium over F2:G2; All Materials over H2:I2.
Present harmonious colour scheme	1 APP	A harmonious scheme of tints and shades of green – forest green (#1E5631) main heading, green (#2E7D32) material headings with white text, light green (#A5D6A7) for the year headings and the TOTAL row, and a pale tint (#E8F5E9) on alternate district rows.
Present accurate information	1 APP	All 7 rows keyed exactly and sorted A to Z (Arima first, Sangre Grande last), TOTAL kept last; All Materials 2024 by =SUM(B4,D4,F4); All Materials 2025 by =SUM(C4,E4,G4); TOTAL row by =SUM(...) on every numeric column. Every figure was checked against a LibreOffice recalculation: all figures keyed in exactly; All Materials and TOTAL correct (grand total 2024 = 56,875 kg, 2025 = 62,537 kg); districts sorted A to Z.
Total	**4**	Every criterion is visibly met; all figures were checked by recalculation.
