Ferry passengers by route, 2024 and 2025

Great Bay Ferry Operators' Association

Ruled Tabulation using Spreadsheet Software

In this download: Ferry Passengers.xlsx · ruled-6 - Sample solution.pdf

The **Table** sheet prints on one A4 landscape page, centred horizontally, with the candidate's name and the label in the footer. The **Formulas** sheet is the formula view (Show Formulas, with gridlines and row and column headings) and prints on page 2.

How this meets the marking criteria

Criterion	Marks	Where it is met in this answer
Selection of appropriate software tool	1 KC	Keyed into Excel worksheet cells on the sheet **Table** (no text boxes or Word table); the main heading is merged and centred across A1:G1.
Present slanted headings	1 APP	The columnar headings in B3:G3 are set vertically at 90° (Format Cells › Alignment › Orientation) and stay readable; group headings merged and centred: 2024 over B2:D2; 2025 over E2:G2.
Present harmonious colour scheme	1 APP	A harmonious scheme of one sea-blue – the heading rows in sea blue (#1A7FA0) with white text, alternate route rows in a light tint (#D4EEF6) and the ALL ROUTES row in a darker tint (#86C8DE) with bold black text.
Present accurate information	1 APP	All 6 rows keyed exactly and sorted in descending order of 2025 Total (Simpson Bay – Anguilla first, Great Bay – St. Kitts last), ALL ROUTES kept last; 2024 Total by =B4+C4; 2025 Total by =E4+F4; ALL ROUTES row by =SUM(...) on every numeric column. Every figure was checked against a LibreOffice recalculation: all six routes keyed in exactly; Totals correct; routes sorted by 2025 Total, busiest first; ALL ROUTES row correct (2024: 125,790 outbound, 123,755 inbound, 249,545 total; 2025: 133,730 outbound, 131,615 inbound, 265,345 total); comma separators, no decimals.
Total	**4**	Every criterion is visibly met; all figures were checked by recalculation.
